The thing I find frustrating at the moment with Apple is the big gap between the 16gb storage of the NANO and the 160 GB of the classic. There is nothing from Apple in between. 16gb is not big enough for my record collection but 160gb is way too big. I did consider buying the 160gb anyway but what swung it was the radio on the Nano.

The Architecture of Computer Hardware, Systems Software and Networking is designed help students majoring in information technology (IT) and information systems (IS) understand the structure and operation of computers and computer-based devices. Requiring only basic computer skills, this accessible textbook introduces the basic principles of system architecture and explores current technological practices and trends using clear, easy-to-understand language. Throughout the text, numerous relatable examples, subject-specific illustrations, and in-depth case studies reinforce key learning points and show students how important concepts are applied in the real world. This fully-updated sixth edition features a wealth of new and revised content that reflects today ' s technological landscape. Organized into five parts, the book first explains the role of the computer in information systems and provides an overview of its components. Subsequent sections discuss the representation of data in the computer, hardware architecture and operational concepts, the basics of computer networking, system software and operating systems, and various interconnected systems and components. Students are introduced to the material using ideas already familiar to them, allowing them to gradually build upon what they have learned without being overwhelmed and develop a deeper knowledge of computer architecture.

This book is the first anthology compiled in English by the CEIBS Case Center to promote China-focused cases worldwide. Included are ten of twenty six award-winning cases from the Global Contest for the Best China-Focused Cases during 2015 to 2017: these works exemplify the quality of effective business cases and share stories of China to the world. Each of the ten cases has a defining feature. Some cases, with a focus on user demand, analyze how companies build their core competence (e.g., Haidilao Hot-Pot and OnePlus Mobile Phone), while others present an array of business innovations in the era of new retail, e-commerce, and the sharing economy (e.g., SF Express, Jinhuobao, ofo, FamilyMart, and Handu Apparel). Some describe Chinese companies ' operations in the overseas market (e.g., Huawei and TECNO), and others depict how foreign companies adapt to the Chinese market in a unique way (e.g., Starbucks). These cases were drawn from Chinese and overseas business schools. The book helps bridge the gap between the world management community ' s interest in China and the limited availability of China-focused management cases. We hope this collection of select cases will prove valuable and informative for our readers.

Discover Apple's Music, TV, Podcasts, and Books apps Version 1.3, updated April 30, 2021 Are you bewildered with the apps that replaced iTunes in Catalina and later? Befuddled by Apple Music? Do you want to customize the Music app sidebar? Wish you could organize your podcasts? Wondering what the difference is between loves and stars? In this book, Kirk McElhearn explains not only how Apple's media apps work, but also how normal people can make the Music, TV, Podcasts, and Books apps do what they want. Take Control of macOS Media Apps is your guide to the post-iTunes world. Whether you just want to play your media, or you want to go deeper with special features like Genius, Shuffle, Playing Next, Apple Music, and iTunes Match, this comprehensive guide has the answers you need. Kirk also looks at various ways of bringing audio and video into Apple's media apps, tagging songs and videos so you can find them more easily later, creating playlists, sharing your library over a home network, and syncing media with your iPhone, iPad, or iPod. The book covers how to: · Play Music: Learn the basics of playing audio (and even music videos) in the Music app. · Stream Music: Use Apple Music, a paid service, to listen to any of 60 million tracks. Or listen to live broadcasts from Apple Music Radio (including Apple Music 1). · View Your Music and Other Content: Learn how to use the sidebar, view your music library, and work with contextual menus in the Music app. · Store Your Music Library in the Cloud: What are the pros and cons of using the Sync Library setting to store your music in the cloud? How do Music and iTunes Match figure out whether to upload your music when that setting is enabled? You ' ll get answers to these questions and more. · Use the iTunes Store: iTunes may be gone, but the iTunes Store is still open for business! Find tips on shopping in the iTunes Store, and get advice on sharing your purchases with family members and among your various Apple devices. · Tag Your Music: Tags are bits of information (also known as " metadata ") that can describe your media. Learn which tags to bother changing, the best ways to add lyrics and album art, how to rate songs with stars, loves, or both, and more. · Organize Your Music: Make a simple playlist of romantic songs, workout songs, or whatever theme you like. · Manage and Share Media Files: Whether you want to casually share a playlist from your laptop when visiting a friend or you want to make all your media available on all your home ' s computers, you ' ll find out how Media Sharing and Home Sharing make sharing possible. · Listen to Audiobooks: Discover how to download and play audiobooks in the Books app, and how to manage your audiobook library. · View Movies and TV Shows: Use the TV app (with or without the forthcoming Apple TV+ service) to watch videos, including those purchased or rented from the iTunes Store and those you add yourself. · Listen to and Watch Podcasts: You ' ll be sampling and subscribing to podcasts in no time with Kirk ' s advice, plus you ' ll pick a method of syncing podcast episodes to your iPhone or iPad and even learn about creating your own podcast station. · Sync Media: You ' ve put all your media on your Mac…now, how do you transfer it to a mobile Apple device? And how do you use an Apple TV to enjoy the media on your Mac? Learn the best approach for your situation. Note: This book covers Apple's media apps in macOS Catalina and Big Sur exclusively. It does not cover iTunes for Windows, the Music/TV/Podcasts/Books apps for iOS and iPadOS, or iTunes running in earlier versions of macOS.
