“The Earth’s five oceans and its water cycle connect all of us in important and unexpected ways”--

The companion to the popular and award-winning A Hundred Billion Trillion Stars. This captivating and educational picture book from Seth Fishman and Isabel Greenberg introduces young readers to basic facts about energy and the human body. Fun, informative and accessible, Power Up is perfect for classroom and family sharing. A great title to read along with Andrea Beaty’s Ada Twist, Scientist and Oliver Jeffers’s Here We Are. Did you know there is enough energy in your pinkie finger to power an entire city? And that everything you do—running, jumping, playing, and exploring—uses that same energy inside of you? In the companion to the acclaimed A Hundred Billion Trillion Stars, Seth Fishman and Isabel Greenberg explore the relationship between energy and the human body, breaking down complicated concepts into small, child-friendly segments. Seth Fishman’s playful text explores the science behind the most energetic kids, while Isabel Greenberg’s vibrant illustrations offer plenty for children to explore in multiple readings. Ideal for curious kids and classroom learning, this engaging book is for fans of Elin Kelsey’s You Are Stardust and John Scieszka’s Science Verse. This nonfiction picture book is an excellent choice to share during homeschooling, in particular for children ages 4 to 6. It’s a fun way to learn to read and as a supplement for activity books for children.

Coming of age in a small Colorado town known for its tall sycamore trees and an elite local boarding school, 16-year-old Mia is shocked when the community is quarantined and surrounded by gun-wielding soldiers amid revelations about her father’s secret work with a genetically engineered disease. A first novel.

Mia and her friends resurface at the well’s end to discover an astounding underground civilization, and immediately find themselves drawn into a terrible civil war.

In the American Mathematical Society’s first-ever book for kids (and kids at heart), mathematician and author Richard Evan Schwartz leads math lovers of all ages on an innovative and strikingly illustrated journey through the infinite number system. By means of engaging, imaginative visuals and endearing narration, Schwartz manages the monumental task of presenting the complex concept of Big Numbers in fresh and relatable ways. The book begins with small, easily observable numbers before building up to truly gigantic ones, like a nonillion, a tredecillion, a googol, and even ones too huge for names! Any person, regardless of age, can benefit from reading this book. Readers will find themselves returning to its pages for a very long time, perpetually learning from and growing with the narrative as their knowledge deepens. Really Big Numbers is a wonderful enrichment for any math education program and is enthusiastically recommended to every teacher, parent and grandparent, student, child, or other individual interested in exploring the vast universe of numbers.

An inspired biographical picture book about a female astronomer who makes huge discoveries about the mysteries of the night sky and changed the way we look at the universe Vera Rubin was one of the astronomers who discovered and named dark matter, the thing that keeps the universe hanging together. Throughout her career she was never taken seriously as a scientist because she was one of the only female astronomers at that time, but she didn’t let that stop her. She made groundbreaking and incredibly significant discoveries that scientists have only recently been able to really appreciate—and she changed the way that we look at the universe. A stunning portrait of a little-known trailblazer, The Stuff Between the Stars tells Vera’s story and inspires the youngest readers who are just starting to look up at the stars.

Valorie Fisher explores how things work with bright, simple graphics so kid-friendly readers will fall in love with learning about the world around them.
