This enlightening book brings together the work of gender and forestry specialists from various backgrounds and fields of research and action to analyse global gender conditions as related to forests. Using a variety of methods and approaches, they build on a spectrum of theoretical perspectives to bring depth and breadth to the relevant issues and address timely and under-studied themes. Focusing particularly on tropical forests, the book presents both local case

studies and global comparative studies from Africa, Asia, and Latin America, as well as the US and Europe. The studies range from personal histories of elderly American women's attitudes toward conservation, to a combined qualitative / quantitative international comparative study on REDD+, to a longitudinal examination of oil palm and gender roles over time in Kalimantan. Issues are examined across scales, from the household to the nation state and the global arena; and reach back to the past to inform present and future considerations. The collection will be of relevance to academics,

researchers, policy makers and advocates with different levels of familiarity with gender issues in the field of forestry.

This book casts a light on the daily struggles and achievements of 'gender experts' working in environment and development organisations, where they are charged with advancing gender equality and social equity and aligning this with visions of sustainable development. Developed through a series of conversations convened by the book's editors with leading practitioners from research, advocacy and donor

Read PDF Agroforestry In Gbv

organisations, this text explores the ways gender professionals - specialists and experts, researchers, organizational focal points - deal with personal, power-laden realities associated with navigating gender in everyday practice. In turn, wider questions of epistemology and hierarchies of situated knowledges are examined, where gender analysis is brought into fields defined as largely techno-scientific, positivist and managerialist. Drawing on insights from feminist political ecology and feminist science, technology and society studies, the authors and their collaborators

Read PDF Agroforestry In Gbv

reveal and reflect upon strategies that serve to mute epistemological boundaries and enable small changes to be carved out that on occasions open up promising and alternative pathways for an equitable future. This book will be of great relevance to scholars and practitioners with an interest in environment and development, science and technology, and gender and women's studies more broadly. The Open Access version of this book, available at <https://www.taylorfrancis.com/books/e/9781351175180>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

How do we integrate gender analysis into forestry research? Where do we start? What challenges are we going to face? What skills are required to conduct gender analysis? What methods are appropriate? What do we do with the data we collect? The answers to these questions often feel elusive. However many of them are within our reach. If you are a CIFOR scientist, partner or other researchers curious about what it means to conduct gender-responsive forestry research this guide is

for you. This guide for was developed to help CIFOR scientists, partners, and program administrators more easily develop their own skills in gender analysis or find the needed resources elsewhere to advance efforts to integrate gender issue into forestry research. The guide provides researchers, ranging from those with no knowledge of gender concepts to those with some familiarity with the topic, with an introduction to the concept of gender and the gender dimensions of key forestry issues. Short thematic briefs outline the key dimensions of various topics including

climate change, REDD+, and value chains. Gender related research questions and methods for conducting gender analysis are also described. The guide also provides tips and advice for building the right research team and gender-sensitive field strategies.

Making Climate Compatible Development Happen introduces readers to the concept of climate compatible development (CCD) through exploring what it might look like, how it could be achieved in practice and identifying challenges and dilemmas raised by CCD. The book brings together research that explores

Read PDF Agroforestry In Gbv

the assumptions underlying CCD and applies the concept in a range of geographic and sectoral settings. The volume makes a significant contribution to the theorisation and evidence-base for how development efforts can be made more climate resilient and with lower greenhouse gas emissions than a 'business as usual' approach. It provides critical reflections on the vision and conceptualisation of CCD, exploring how to encourage it, and what trade-offs and challenges may be encountered. The contributions discuss the feasibility of achieving CCD, mechanisms that may support

Read PDF Agroforestry In Gbv

progress towards it, challenges that may be experienced and the roles of, and impacts on, different stakeholder groups. Following a critical reflection on the concept of CCD, the potential nature of, and barriers to, CCD, it is examined in relation to agriculture, renewable energy, forestry, pastoralism, coastal areas and fisheries, with case studies taken from countries including Ghana, India, Kenya, Mongolia, Mozambique and Peru. The book provides a valuable cross-sectoral and international critical reflection on the theory and practice of CCD, and will be a resource for

to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-
