The Type 916 Alfa Romeo GTV Coup é and Spider cousin followed the Fiat Coup é onto the market, establishing the Italians as the ones to beat in this market sector. Like the Fiat, it was a car underpinned by a heavily modified Tipo platform, but Alfa Romeo engineers worked extremely hard on this car to give it world-beating front-wheel drive handling.

The name "GTV" is legendary to Alfa fans, and in some ways you could argue that the 916 series GTV wasn't deserving of the name - it was, after all, a front wheel drive car. But discount that, and the GTV was a striking design that really stood apart from its contemporaries, combining classic Alfa design elements into a new and unique car that ...

The V6 TB engine was developed by Alfa Romeo to allow the GTV to circumvent Italian tax laws. Those laws imposed higher sales taxes on cars with engine capacities higher than 2.0-liters. By taking their existing 3.0-liter V6 engine and reducing the capacity to 1,997cc, this moved the car into the lower tax bracket.

Alfa Romeo 916 GTV and Spider traces the complete story of the Alfa Romeo GTV and Spider models produced between 1994 - 2005, commonly known to enthusiasts by the manufacturer's project code as the 916 series.

Alfa Romeo 916 GTV and Spider traces the complete story of the Alfa Romeo GTV and Spider models produced between 1994 - 2005, commonly known to enthusiasts by the manufacturer's project code as the 916 series. The 916 models would always

be controversial - they replaced the iconic Spider, the best-selling Alfa Romeo sports model of all time, and the brand-establishing Alfetta GTV. Sharing components and a platform with a humble Fiat hatchback, would the cars ever be considered 'real' Alfa Romeos? The cars were critically acclaimed, and, though they faced tough competition in the late 1990s from the likes of the Audi TT, they remained in production for over a decade. Topics covered include: Full history of the 916 series GTV and Spider models; Design, development and evolution of the models from 1994 - 2005; Participation of the GTV in motorsport; Model variations in depth through all three facelifts; Previously unpublished production figures, and chassis numbers for the desirable, limited-edition GTV Cup model. Comprehensively researched guide to the entire lifespan of the 916 series. Will appeal to Alfa Romeo and automotive enthusiasts. The history and design process are examined along with an in-depth guide to each of the model variants produced. The cars' current position in the classic car market is considered. Superbly illustrated with 240 colour photographs. Robert Foskett is a life-long Italian car enthusiast with a special interest in Alfa Romeo.

Detailing more than one hundred classic cars built between the 1950s and early 1990s with close-up gallery photographs, a comprehensive history highlights each model's production figures, competition successes, mechanical and body modifications, and more. Reprint.

Following in the tracks of the author's well-known Alfa DOHC tuning manual, Jim Kartalamakis describes all kinds of useful information and techniques to increase power, performance and reliability of V6 Alfas and their engines. This book is the result of much research and firsthand experience gained through many projects concerning Alfa V6 rear-wheel drive models, from the GTV6 series to the last of the 75 3.0 models. A wealth of completely new information can be found here regarding cylinder head mods, big brake mods, LSD adjustment procedure, suspension modifications for road and track, electrical system improvements, flowbench diagrams, dyno plots, and much more!

Of all the major air forces that were engaged in the war, only the Red Air Force had units comprised specifically of women. Initially the Red Air Force maintained an all-male policy among its combat pilots. However, as the apparently invincible German juggernaut sliced through Soviet defenses, the Red Air Force began to rethink its ban on women. By October 1941, authorization was forthcoming for three ground attack regiments of women pilots. Among these women, Lidiya Vladimirovna "Lilya" Litvyak soon emerged as a rising star. She shot down five German aircraft over the Stalingrad Front, and thus became history's first female ace. She scored 12 documented victories over German aircraft between September 1942 and July 1943. She also had many victories shared with other pilots, bringing her possible total to around 20. The fact that she was a 21-year-old woman ace was not lost on the hero-hungry Soviet media, and soon this colourful character, whom the Germans dubbed

“ The White Rose of Stalingrad, ” became both folk heroine and martyr.

This portfolio is about the revival of Alfa Romeo sports cars and coupes, one of the most desirable and popular of the Italian genre. Their progress is traced through driving impressions, road and comparison tests, model introduction reports and history articles. Full specifications are included together with performance and technical data plus advice is given on buying a good used example. Covered are 2.0 Twin spark 16V, 3.0 & 3.2 V6 & Cup.

Buying a car is an expensive business and mistakes can prove costly. Wouldn't it be great if you could take an expert with you? With the aid of this book's step-by-step guidance from a marque specialist, you can! The unique points system will help to place the car's value in relation to condition while extensive photographs illustrate the problems to look out for.

Head gasket repairs, valve adjustments, camshaft timing, carb and SPICA fuel injection tuning, and driveshaft donut replacement are all explained. Experienced, hands-on guidance that'll keep you in the drivers seat.

Whether you want to go racing or have maximum street performance, the expert advice in this book will help you to build a powerful and reliable engine first time-without wasting money on incompatible components or modifications that don't work. Covers 1300, 1600, 1750, 1800 and 2000 dohc engines (not Twin Spark). Also offers advice on suspension, brakes, steering and gearing.
