The book has been designed topic and subtopic-wise, keeping the students' needs in mind. The current edition has certain unique features: This book is strictly as per the latest CBSE syllabus and covers complete matter as per the NCERT book. After every topic, objective type questions and case studies are given based on the latest CBSE Sample Paper (2020). (Hints of their answers are given at the end of each chapter.) At the end of each chapter, 40 objective type questions (20 MCQs + 10 Fill in the blanks + 10 True/False) are given along with answers at the end. Keywords of each topic are given at the end of each topic, to help students to solve case studies. A flow chart of each chapter is given at the end to recap the topics covered in that chapter. Quick revision is given to revise all the topics in short time. At the end of each chapter, questions asked in last 7 years' board exam are given, so that the student may get an idea of what types of questions are expected from this chapter. (Hints of answers of these questions are also given). Case Studies are framed by using words strictly from the NCERT. A solved sample paper of CBSE 2020 is also given. Guidelines for project are also given. A sample project on Marketing Management is also given. The Subject Matter is presented in simple language, in points, and along with diagrams, so that the student may find it easy to understand.

Physics MCQs for the Part 1 FRCR is a comprehensive and practical revision tool for the new format Part 1 FRCR examination, covering the complete physics curriculum. Key features: • Contains 300 questions that reflect the style and difficulty of the real exam • Covers basic physics, radiation legislation and all the imaging modalities included in the Royal College of Radiologists training curriculum and new FRCR examination • Includes new exam topics such as MRI and ultrasound imaging • Answers are accompanied by clear, detailed explanations giving candidates in-depth understanding of the topic • Much of the question material is based on the Radiology-Integrated Training Initiative (RITI), as recommended by the Royal College of Radiologists A must-have revision resource for all Part 1 FRCR candidates, Physics MCQs for the Part 1 FRCR is written by a team of specialist registrars who have recently successfully passed the Part 1 FRCR exam and a renowned medical physicist.

A beautifully illustrated monograph with 163 color photographs, is one of the very few books to focus on the ENT patient in clinical methods.

Develop the skills you need to effectively and efficiently document patient care for children and adults in clinical and hospital settings. This handy guide uses sample notes, writing exercises, and EMR

activities to make each concept crystal clear, including how to document history and physical exams and write SOAP notes and prescriptions.

So what's so special about doctors and their families? Many doctors feel that they are expected to give too much of their time to a medical career to the detriment of their family and their personal lives. This book is a practical guide to provide support and ideas on how to cope with stresses directly suffered or passed on from a relative or spouse. Written in a clear and practical style using information collated from family members describing their feelings about having a doctor in the family it provides unique and vital information on how to minimise the effects of having a medical career on the family. Essential reading for doctors and their families.

ABC of Dermatology is the bestselling, practical guide for anyone involved in clinical dermatology. This fully illustrated book helps readers identify, recognise, treat, and manage the common dermatological conditions encountered in daily practice. The seventh edition has been revised and updated to incorporate current approaches to the management of skin disease, such as the use of new biological agents for treating inflammatory disease and tumours, and new chapters on cosmetic dermatology procedures, genital dermatology and cutting-edge advances in genetics and pathophysiology. Presents a practical approach to clinical dermatology that relates skin changes to specific skin conditions and underlying pathology Summarises relevant pathological processes, diagnostic features, learning points, and treatment options for a range of conditions Offers hundreds of full-colour clinical photographs that illustrate manifestations of skin disease in a multitude of diverse skin tones and ethnic groups Covers a wide range of skin management treatments, from simple interventions to sophisticated immunotherapies Includes insights on the increasing use of teledermatology by remote doctors ABC of Dermatology is a must-have guide for GPs, junior doctors, medical students, and primary healthcare professionals.

"The series "Clinical Approach and Procedures in Cosmetic Dermatology" intends to be a practical guide in Cosmetic Dermatology. Procedures in cosmetic dermatology are very popular and useful in medicine, indicated to complement topical and oral treatments not only for photodamaged skin but also for other dermatosis such as acne, rosacea, scars, etc. Also, full-face treatments using peeling, lasers, fillers and toxins are increasingly being used, successfully substituting or postponing the need for plastic surgeries. Altogether, these techniques not only provide immediate results but also help patients to sustain long-term benefits, both preventing/treating dermatological diseases and maintaining a healthy and youthful skin. Throughout this series, different treatments in Cosmetic Dermatology will be discussed in detail covering the use of many pharmacological groups of cosmeceuticals, the new advances in nutraceuticals and emerging technologies and procedures. This volume, entitled "Botulin Toxin, Fillers and Related Substances" addresses the most important chemical approaches in cosmetic dermatology. Here are discussed in detail the use of Botulinum toxins and fillers, such as hyaluronic and polylactic acids."--Publisher's website.
