Let's-Read-and-Find-Out about Endangered Animals Have you seen a northern hairy-nosed wombat or an eastern barred bandicoot? These animals are so rare, they might disappear forever, and they're not alone. Read and find out about some of the animals that are almost gone. Introduce basic science concepts to young children and help satisfy their curiosity about how the world works.

Describes animals that are in danger of extinction, including the golden lion tamarin and the giant stick insect.

Created in consultation with teachers and public librarians, this fantastic collection of 101 ready-to-use book lists provides invaluable help for any educator who plans activities for children that involve using literature.

The focus of this book is the inclusion of informational texts in primary-grade teaching and learning. Each chapter references particular Common Core State Standards that are connected to the chapter and includes techniques to aid students in obtaining mastery of the Standards.

The latest edition of Pamela Farris 's popular, value-priced text continues to offer pre- and in-service teachers creative strategies and proven techniques sensitive to the needs of all elementary and middle school learners. Coverage includes the C3 Framework and the four sets of learning from the National Curriculum Standards for Social Studies. Farris, together with contributors who specialize in implementing successful teaching methods and theories, demonstrate how classroom teachers can excite and inspire their students to be engaged learners.

On any given day, a visitor to Mary Shorey's classroom will find elementary students using a variety of learning tools, from books to wikis and blogs, to pose critical questions about the world and take action to make a difference in the lives of others. Whether sponsoring a book drive for victims of Hurricane Katrina, using a multimedia presentation to persuade the principal to adopt their recycling plan, or challenging a senior citizen's eviction, it's all in a day's work for Mary's students. Her young learners are becoming conscious consumers, creative thinkers, and effective communicators even while fulfilling the mandated curriculum and Common Core Standards. As Shorey and coauthor Penny Silvers write in Many Texts, Many Voices, "Critical literacy requires that the reader/consumer examine multiple perspectives and ask, "Whose interests are being served?" and "Whose voice is heard—or silenced?..."Rather than an addition to a lesson or curriculum, critical literacy is a way of thinking, communicating, analyzing, and living a literate life. Critical literacy also implies the possibility of taking some kind of social action in order to support a belief, make a difference, or simply help during a time of need." Always mindful of what is appropriate for young children, Shorey and Silvers continually search for opportunities to embed critical literacy and inquiry in the everyday lives of primary students. Through a rich array of rubrics, sample lessons, text sets, unit designs, and professional resources, Silvers and Shorey share their reflective practices so that all teachers can use print, visual, and digital tools to transform student learning.

Your resource for best texts and best practices! Kathy Barclay and Laura Stewart have written the book that teachers like you have been pleading for—a resource that delivers the " what I need to know " to engage kids in a significant amount of informational text reading experiences. No filler, no lofty ideals about college and career readiness, but instead, the information on how to find lesson-worthy texts and create developmentally appropriate instructional plans that truly help young readers comprehend grade-level texts. What you 'll love most: The how-to 's on selecting informational texts High-impact comprehension strategies Model text lessons and lesson plan templates An annotated list of 449 informational texts

"Over the last half billion years, there have been five major mass extinctions, when the diversity of life on Earth suddenly and dramatically contracted. Scientists are currently monitoring the sixth extinction, predicted to be the most devastating since the asteroid impact that wiped out the dinosaurs. This time around the cataclysm is us. In this book the author tells us why and how human beings have altered life on the planet in a way no species has before. She provides a moving account of the disappearances of various species occurring all around us and traces the evolution of extinction as concept, from its first articulation by Georges Cuvier in revolutionary Paris up to Lyell and Darwin, and through the present day. The sixth extinction is likely to be mankind's most lasting legacy, compelling us to rethink the fundamental question of what it means to be human". -- Back cover.

Provides a detailed curriculum uniquely designed for second graders and their growing command of literacy.
