Lucille Cholerton is a specialist in gluten sensitivity and coeliac disease. She and her three grown children all suffer from gluten sensitivity. Read her story in Spotlight on Gluten: New symptoms for the new millennium? Or long-standing symptoms now being recognized? Age is very pertinent to the subject of gluten sensitivity. This disorder should really be diagnosed in childhood, but if the diagnosis is missed, people can suffer for many years with unexplained symptoms, when something that they are eating every day could be the root cause of their ill health. This book covers the symptoms that Cholerton and her children suffered, and how they improved their health dramatically on a gluten-free diet. The author's research spans twenty years. In my research I discovered that gluten may be responsible for many autoimmune disorders, of which there are some eighty-eight documented. My doctors knew nothing about this, so I really had to be my own guinea pig. A former teacher, Lucille Cholerton is now a nutrition counselor and is writing her next books on gluten sensitivity. There is a dire need for better diagnosis and understanding of this disorder. She is married and lives in Durban, South Africa. She started the Gluten Intolerance/Coeliac Support Group in Durban in 1995. For more information about gluten, visit <http://www.allergysa.org>. Father Romano Zago, a Franciscan Friar and scholar, wrote the book Cancer Can Be Cured to reveal to the world an all natural Brazilian Recipe that contains the juice made from the whole leaf plant of Aloe Arborescens and honey that has been shown to rapidly restore the body's health so it heals itself of all

types of cancer. The book tells how it was while administering to the poor in the shantytown of Rio Grande dol Sul , Brazil that he and the provincial Father Arno Reckziegel, witnessed the healing of simple people of cancer who used this recipe. Later, when he had assignments in Israel and Italy where this aloe species grows naturally he continued to see great success in the chronically ill being cured when he recommended they use this recipe. This inspired for him to spend the next 20 years in researching the science behind this aloe species and the publication of that research in this book along with his numerous first hand anecdotes of cancer healing by those using the Brazilian juice recipe. Chapters include information on how to prepare the recipe using the three ingredients of whole leaf Aloe arborescens juice, honey and a small amount of distillate (1%); how to take the preparation; questions and answers on everything from how to pick the aloe leaves, why each of the three ingredients is important in the recipe, the types of cancer that have been cured using the recipe, other diseases and health problems the recipe has shown to be beneficial in helping the human body solve; the internationalization of the recipe on five continents; anecdotal stories of some body healings; the composition of Aloe; and Aloe and Aids. There has been much publicized scientific research and literature on the synergistic benefits of the 300 phytotherapeutic biochemical and nutrient constituents of Aloe vera to aid the body's defenses to enhance the immune system and protect against diseases. However, this is the first book to reveal the little known potency
