Beauty & Holistic Studies has been established since 2007 and in that time, has become one of the beauty industries leading providers in education resources. With subjects being added on a regular basis, it has helped over 30,000 students worldwide to gain success in their exams. Beauty & Holistic Studies was created by Kate Tierney, an experienced beauty and complementary tutor who understands the demands placed on today's busy students. As well as having jobs and families, students must attend a rigorous class schedule, one that includes intense practical and theory based subjects. With all of these demands, there is hardly any time left to follow a proper study program. With this in mind, these revision guides have been designed to provide students with the necessary knowledge and tools to pass their exams with ease. Students are able to practice the skills they have learned in college, all from the comfort of their own homes.

This third edition provides 2900 multiple choice questions on human anatomy and physiology, and some biophysical science, separated into 20 chapters and 68 categories. In addition, there are 64 essay topics. The answer to each question is accompanied by an explanation. Each chapter has an introduction to set the scene for the questions to come. However, not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The textbook offers a more holistic approach to the subjects of anatomy and physiology by also including biomechanics, biophysics and biochemistry. The questions have been used in end-of-semester examinations for undergraduate anatomy and physiology courses, and as such, reflect the focus of these particular courses and are pitched at this level to challenge students that are beginning their training in anatomy and physiology. The question and answer combinations are intended for use by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition and dietetics, health sciences, exercise science, and students taking an anatomy and physiology course as an elective.

Anatomy and Physiology for Nurses at a Glance is the perfect companion for study and revision for pre-registration nursing and healthcare students, from the publishers of the market-leading at a Glance series. Combining superb illustrations with accessible and informative text, this book covers all the body systems and key concepts encountered from the start of the pre-registration nursing or healthcare programme, and is ideal for anyone looking for an overview of the human body. Providing a concise, visual overview of anatomy and physiology and the related biological sciences, this book will help students develop practical skills, enabling them to become caring, kind and compassionate nurses. Superbly illustrated, with full colour illustrations throughout Breaks down complex concepts in an accessible way Written specifically for nursing and healthcare students with all the information they need Includes access to a companion website with self-assessment questions for each chapter Available in a range of digital formats- perfect for 'on the go' study and revision

Extensively revised and updated, this fourth edition of Physiology at a Glance continues to provide a thorough introduction to human physiology, covering a wealth of topics in a comprehensive yet succinct manner. This concise guide breaks this often complex subject down into its core components, dealing with structures of the body from the cellular level to composite systems. New to this edition are three chapters on cell signalling, thermoregulation, and altitude and aerospace physiology, as well as a glossary of terms to aid medical, dental, health science and biomedical students at all levels of their training. Featuring clear, full-colour illustrations, memorable data tables, and easy-to-read text, Physiology at a Glance is ideal as both a revision guide and as a resource to assist basic understanding of key concepts.

Perfect for introductory level students, Hole's Human Anatomy and Physiology assumes no prior science knowledge by focusing on the fundamentals. This new edition updates a great A&P classic while offering greater efficiencies to the user. The 15th edition focuses on helping students master core themes in anatomy and physiology, which are distilled down into key concepts and underlying mechanisms.

Specifically designed to help candidates revise for the MRCS exam, this book features 350 Single Best Answer multiple choice questions, covering the whole syllabus. Containing everything candidates need to pass the MRCS Part A SBA section of the exam, it focuses intensively on the application of basic sciences (applied surgical anatomy, physiology, and pathology) to the management of surgical patients. The high level of detail included within the questions and their explanations allows effective self-assessment of knowledge and quick identification of key areas requiring further attention. Varying approaches to Single Best Answer multiple choice questions are used, giving effective exam practice and guidance through revision and exam technique. This includes clinical case questions, 'positively-worded' questions, requiring selection of the most appropriate of relatively correct answers; 'two-step' or 'double-jump' questions, requiring several cognitive steps to arrive at the correct answer; as well as 'factual recall' questions, prompting basic recall of facts.

Multiple Choice Questions in Anatomy and Neurobiology for Undergraduates is a collection of multiple choice questions in anatomy and neurobiology for undergraduate students. Questions are grouped for each visceral system and the nervous system. In the case of the body framework (including peripheral nerves and blood vessels), however, a regional grouping is used. Each question has the corresponding correct answer. This book is comprised of eight chapters covering the upper limb, head and neck, musculoskeletal trunk, lower limb, cardiovascular and respiratory systems, gastrointestinal and genito-urinary systems, and neurobiology. Each chapter contains three types of questions designed to test knowledge in different ways. Type A items involve choosing a single correct answer from five available choices. Type L items are used to elicit information on the cause-effect relationship between sets of data. Type E items call for the perception of one or more correct responses among four alternatives, and the responses may be grouped in five different ways. Most questions are also accompanied by an indication of the percentage of students who obtained the correct answer on occasions of previous settings and by a biserial correlation coefficient (r biserial), indicative of the capacity of the question to distinguish between more able and less able students. This monograph is primarily intended for medical undergraduates and will also be useful to academic anatomists building up their own question banks.

This handy self-assessment paperback contains over 500 multiple-choice-questions to help readers evaluate their understanding of introductory level human biology. Fully indexed, with helpful explanations given throughout the answer section, the book will be ideal for students of nursing and allied health professions, biomedical and paramedical science, operating department practice, and complementary therapy and massage therapy. Over 500 MCQs support revision and learning Ideal for individual use or in an informal group setting Perfect prior to exams and/or for use during 'placement breaks' or 'on the move'!
