Anti-Gravity and the World Grid - Nexus Magazine

Anti-gravity is a hypothetical phenomenon of creating a place or object that is free from the force of gravity. It does not refer to the lack of weight under gravity experienced in free fall or orbit, or to balancing the force of gravity with some other force, such as electromagnetism or aerodynamic lift. Anti-gravity is a recurring concept in science fiction, particularly in the context of spacecraft propulsion. Examples are the gravity blocking substance "Cavorite" in H. G. Wells's The First M

This riveting work of investigative reporting and history exposes classified government projects to build gravity-defying aircraft—which have an uncanny resemblance to flying saucers. The atomic bomb was not the only project to occupy government scientists in the 1940s. Antigravity technology, originally spearheaded by scientists in Nazi Germany, was another high priority, one that still may be in effect today. Now for the first time, a reporter with an unprecedented access to key sources in the intelligence and military communities reveals suppressed evidence that tells the story of a quest for a discovery that could prove as powerful as the A-bomb. The Hunt for Zero Point explores the scientific speculation that a "zero point" of gravity exists in the universe and can be replicated here on Earth. The pressure to be the first nation to harness gravity is immense, as it means having the ability to build military planes of unlimited speed and range, along with the most deadly weaponry the world has ever seen. The ideal shape for a gravity-defying vehicle happens to be a perfect disk, making antigravity tests a possible explanation for the numerous UFO sightings of the past 50 years. Chronicling the origins of antigravity research in the world's most advanced research facility, which was operated by the Third Reich during World War II, The Hunt for Zero Point traces U.S. involvement in the project, beginning with the recruitment of former Nazi scientists after the war. Drawn from interviews with those involved with the research and who visited labs in Europe and the United States, The Hunt for Zero Point journeys to the heart of the twentieth century's most puzzling unexplained phenomena.

In the tradition of The Anti-Gravity Handbook and the Time-Travel Handbook comes this all-new compilation of material on anti-gravity, free energy, flying saucers and Tesla technology. With plenty of technical drawings and explanations, this suppressed technology will change the world in ways we can only dream of. Chapters on anti-gravity mercury gyros, the motionless electromagnet generator patent, the Tesla pyramid engine, anti-gravity patents, rare photos of the machines in flight, and tons more. The book that finally blows the lid on suppressed technology and anti-gravity! Heavily illustrated.

The new expanded compilation of material on Anti-Gravity, Free Energy, Flying Saucer Propulsion, UFOs, Suppressed Technology, NASA Cover-ups and more. Highly illustrated with patents, technical illustrations and photos. This revised and expanded edition has more material, including photos of Area 51, Nevada, the government's secret testing facility. This classic on weird science is back in a new edition! Includes: How to build a flying saucer; Arthur C. Clarke on Anti-Gravity; Crystals and their role in levitation; Secret government research and development; Nikola Tesla on how anti-gravity airships could draw power from the atmosphere; Bruce Cathie's Anti-Gravity Equation; NASA, the Moon and Anti-Gravity; The mysterious technology used by the ancient Hindus of the Rama Empire; The Rand Corporation's 1956 study on Gravity Control; T. Townsend Brown's electro-gravity experiments; How equations exist for electro-gravity and magneto-gravity; Tons of patents, schematics, photos, cartoons and other illustrations!

Rediscover the legendary names of suppressed scientific revolution-remarkable lives astounding discoveries, and incredible inventions which would have produced a world of wonder. How did the aura research of Baron Karl von Reichenbach prove the vitalistic theory and frighten the greatest minds of Germany? How did the physiophone and wireless of Antonio Meucci predate both Bell and Marconi by decades? How did the geoaetheric engines of Nikola Tesla threaten the establishment of a fuel-dependent America? Why did the Air Force initially fund the gravitational warp research and warp-cloaking devices of T Townsend Brown and then reject it? Each chapter is a biographic treasure. Ours is a world living hundreds of years behind its intended stage of development. Complete knowledge of this loss is the key to recapturing this wonder technology.

Explored here is how gravity, electricity, and magnetism manifest from a unified field around us; why artificial gravity is possible; secrets of UFO propulsion; free energy; Nikola Tesla and anti gravity airships of the 20s and 30s; flying saucers as superconducting whirfs of plasma; anti-mass generators; vortex propulsion; government cover-ups; gravitational pulse drive; spacecraft; and more.

With his talking dog, Frankie, as a constant companion, ten-year-old Cal Barraclough investigates his wacky neighbor's unusual experiments.

A complete investigation of the development and suppression of antigravity and field propulsion technologies
• Reveals advanced aerospace technologies capable of controlling gravity that could revolutionize air travel and energy production
• Reviews numerous field propulsion devices that have thrust-to-power ratios thousands of times greater than a jet engine
• Shows how NASA participates in a cover-up to block adoption of advanced technologies under military development
In Secrets of Antigravity Propulsion, physicist Paul LaViolette reveals the secret history of antigravity experimentation—from Nikola Tesla and T. Townsend Brown to the B-2 Advanced Technology Bomber. He discloses the existence of advanced gravity-control technologies, under secret military development for decades, that could revolutionize air travel and energy production. Included among the secret projects he reveals is the research of Project Skyvault to develop an aerospace propulsion system using intense beams of microwave energy similar to that used by the strange crafts seen flying over Area 51. Using subquantum kinetics—the science behind antigravity technology—LaViolette reviews numerous field-propulsion devices and technologies that have thrust-to-power ratios thousands of times greater than that of a jet engine and whose effects are not explained by conventional physics and relativity theory. He then presents controversial evidence about the NASA cover-up in adopting these advanced technologies. He also details ongoing Russian research to duplicate John Searl's self-propelled levitating disc and shows how the results of the Podkletnov gravity beam experiment could be harnessed to produce an interstellar spacecraft.

Winner of the 1974 National Book Award "A screaming comes across the sky. . ." A few months after the Germans' secret V-2 rocket bombs begin falling on London, British Intelligence discovers that a map of the city pinpointing the sexual conquests of one Lieutenant Tyrone Slothrop, U.S. Army, corresponds identically to a map showing the V-2 impact sites. The implications of this discovery will launch Slothrop on an amazing journey across war-torn Europe, fleeing an international cabal of military-industrial superpowers, in search of the mysterious Rocket 00000, through a wildly comic extravaganza that has been hailed in The New Republic as "the most profound and accomplished American novel since the end of World War II."

In a science fiction thriller set in modern America, a male alcoholic stoner obsessed with faster than light travel must evade and outsmart the near omniscient Project Luddite and It's All Seeing Eye to see his dream come true.Sample Chapter - Debunking the DebunkersI made my way from my bedroom where I had just steamrolled several hits of cannabis off of my bong, getting nice and high, to my home office. I went to Google first, I found an article called How I Control Gravitation by Thomas Townsend Brown. It discusses an experiment of his using two 44lb lead spheres suspended by a wire, positive for one sphere, negative for the other sphere with a glass rod in between the spheres. When 120kV of steady DC electricity was turned on Brown claims the apparatus moved in the direction from negative sphere to positive sphere.Now there are lifter builders out there who will claim the Biefeld-Brown effect is nothing more than ion wind, electrically charged air, and that air flow is what lifts the craft into the air. They have even put lifters in a vacuum to show the propulsion effect will not work without air and would therefore be useless in the vacuum of space. Lifters are missing what appears to be a critical component, the dielectric between the positive and negative plates, in this example the glass rod or in the ARV the plastic, G10, or epoxy resin.Otherwise, for there to be movement of the 44lb spheres, Brown's lab would had to have a hurricane blowing through it. That does not seem likely. Occam's Razor says the simplest reason is the most likely one, even if that reason defies the known laws of physics. The experimental data trumps theory.Further research was required though I found one paper, Twenty First Century Propulsion Concept: http://www.otherhand.org/wp-content/uploads/2012/04/Talley-paper-propulsion-concept.pdf, in the Anomalies section, a series of experiments with pulsed voltages was done.Generally, no motion of the test devices was observed, except in Test No. 69 (the last test) where a very small but detectable motion was seen.The only experiment producing a result was when the 19kV was applied to the positive plate at a pulse rate frequency of 600 Hz with a solid dielectric between the capacitor plates that caused the torsion pendulum to twist ever so slightly, applying a small but consistent pressure.I took another break to smoke some more cannabis from my bowl. I calmly watched the smoke fill the room as I exhaled. Euphoria and certainty that I was onto something filled my mind like the smoke in the room.Another paper, Asymmetrical Capacitors for Propulsion: http://www.forbiddentechnology.org/pdfs/Asymmetrical Capacitors for Propulsion.pdf, in the Observations section detailed one of the experiments where movement was seen in a vacuum. Only the capacitor with a solid dielectric between the positive and negative capacitor plates moved in a vacuum when the 50kV steady DC was first applied to the positive capacitor plate. A rotation of about 1/8th was seen through the viewing port of the vacuum chamber. A spark accompanied the movement which stopped just after it started.The conductors of the experiment speculated that material had been ejected when the spark occurred and that that was why the capacitor moved. That seems unlikely to me, after all, why weren't there sparks and material ejected when the other capacitors were tested? Furthermore, if they had encased the Brown capacitor with epoxy that would have eliminated the spark and they would have been able to tell if the Brown capacitor would have still moved.The key appears to be high voltage, the higher the better, those last two experiments used 19kV and 50kV, Brown used 120kV steady DC, and the ARV supposedly used 500kV - 1,000kV DC, pulsed into the capacitors.
