Both educators and their students are involved in the process of assessment – all parties are expected to meet and exceed expectations in the face of competing conditions. New practices are being developed to enhance students' participation, especially in their own assessment, be it though peer-review, reflective assessment, the introduction of new technologies, or other novel solutions. Though widely researched, few have measured these innovations' effectiveness in terms of satisfaction, perceived learning, or performance improvements. Innovative Practices for Higher Education Assessment and Measurement bridges the gap between political discourse, theoretical approach, and teaching practices in terms of assessment in higher education. Bringing new insights and presenting novel strategies, this publication brings forth a new perception of the importance of assessment and offers a set of successful, innovative practices. This book is ideal for educators, administrators, policy makers, and students of education.

With the rapid proliferation of distance education and e-learning courses, the need is growing for a comprehensive, professional approach to evaluating their effectiveness. This indispensable book offers a road map to guide evaluation practice in these innovative learning environments. Providing practical, step-by-step guidelines and tools for conducting evaluation studies—including how to deal with stakeholders, develop surveys and interview protocols, collect other scientific evidence, and analyze and blend mixed-methods data—the work also features a template for writing high-quality reports. The "unfolding model" developed by the authors draws on Messick's influential assessment framework and applies it to program evaluation. Two case studies of actual programs (a distance learning course and an e-learning course) demonstrate the unfolding model in action.

"This book provides a view of the possibilities and challenges facing online educators and evaluators in the 21st century"--Provided by publisher.

Successful use of information and communication technologies depends on usable designs that do not require expensive training, accommodate the needs of diverse users and are low cost. There is a growing demand and increasing pressure for adopting innovative approaches to the design and delivery of education, hence, the use of online learning (also called E-learning) as a mode of study. This is partly due to the increasing number of learners and the limited resources available to meet a wide range of various needs, backgrounds, expectations, skills, levels, ages, abilities and disabilities. The advances of new technology and communications (WWW, Human Computer Interaction and Multimedia) have made it possible to reach out to a bigger audience around the globe. By focusing on the issues that have impact on the usability of online learning programs and their implementation, Usability Evaluation of Online Learning Programs specifically fills-a gap in this area, which is particularly invaluable to practitioners.

"This book provides readers with a broad understanding of the emerging field of e-learning and also advises readers on the issues that are critical to the success of a meaningful e-learning environment"--Provided by publisher.

Bringing together the expertise of top evaluation leaders from around the world, The SAGE International Handbook of Educational Evaluation addresses methods and applications in the field, particularly as they relate to policy- and decision-making in an era of globalization. The comprehensive collection of articles in the Handbook compels readers to consider globalization influences on educational evaluation within distinct genres or families of evaluation approaches.

Key Features Discusses substantive issues surrounding globalization, and its implication for educational policy and practice and ultimately evaluation; Includes state-of-the-art theory chapters and method chapters within scientific, accountability-oriented, learning-oriented, and political genres of evaluation approaches; Provides real-world case exemplar chapters to illustrate core concepts within genres; Extends dialogue on controversial topics and contemporary educational evaluation tensions in the context of globalization; Summarizes, by means of an integration chapter, the issues, tensions and dilemmas confronting educational evaluators in an era of globalization. Serving as a state-of-the-art resource on educational evaluation, this volume is designed for graduate students, evaluation scholars and researchers and professional evaluation practitioners with an interest in educational program and policy evaluation.

Instructional quality can make or break the learning experience, especially in digital environments where the expressional nuances of interpersonal communication are lost. The most effective distance education instructors and experts are those who recognize the educational needs of students and are able to address those needs through creative use of the technological tools available to them. Identification, Evaluation, and Perceptions of Distance Education Experts explores the current and future trends, needs, and priorities that affect the development of distance education in a postmodern world. This premier reference work will be of significance to those interested in online learning, teaching and training, communication, and education across multiple sectors such as universities, colleges, schools, profit/non-profit e-organizations, and e-commerce.

Primary and Secondary education is a formative time for young students. Lessons learned before the rigors of higher education help to inform learners' future successes, and the increasing prevalence of learning tools and technologies can both help and hinder students in their endeavors. K-12 Education: Concepts, Methodologies, Tools, and Applications investigates the latest advances in online and mobile learning, as well as pedagogies and ontologies influenced by current developments in information and communication technologies, enabling teachers, students, and administrators to make the most of their educational experience. This multivolume work presents all stakeholders in K-12 education with the tools necessary to facilitate the next generation of student-teacher interaction.

With the demand to maintain a competitive advantage, the assessment and evaluation of education is vital in measuring the knowledge and skills of the students, community, and educational system as a whole by providing educators with the facts needed to enhance and improve the learning process. Cases on Assessment and Evaluation in Education presents a collection of case studies describing the methods used to assess an education course, what factors to assess, as well as which factors determine the success of these factors. This casebook aims to bring together different research perspectives on the questions surrounding the issues of educational assessment and evaluation.

The perfect all-in-one guide for future nurse educators! The award-winning Teaching in Nursing: A Guide for Faculty, 6th Edition prepares you for the day-to-day challenges of teaching future nurses for practice in today's rapidly evolving healthcare system. This comprehensive resource is the only one of its kind to cover all four components of nursing education: teaching and learning, curriculum, evaluation, and technology-empowered learning. You'll benefit from the expert guidance on such key issues as curriculum and test development, diverse learning styles, the redesign of healthcare systems, and advances in technology and information. Plus, the 6th edition includes a unique new chapter on Global Health and Curricular Experiences along with updated information on technology-empowered learning, the flipped classroom, interprofessional education, interprofessional collaborative practice, and much more. Comprehensively addresses all four components of nursing education including teaching and learning, curriculum, evaluation, and technology-empowered learning. Coverage of concept-based curricula includes strategies on how to approach and implement concept-based instruction. Pedagogical aids include Evidence-Based Teaching boxes, covering such issues as how to do evidence-based teaching; applications of evidence-based teaching; implications for faculty development, administration, and the institution; and how to use the open-ended application questions at the end of each chapter for faculty-guided discussion. Strategies to promote critical thinking and active learning are incorporated throughout the text, highlighting various evaluation techniques, lesson planning insights, and tips for developing examinations. Guidance on teaching in diverse settings addresses such topics as the models of clinical teaching, teaching in interdisciplinary settings, how to evaluate students in the clinical setting, and how to adapt teaching for community-based practice. Strong emphasis on teaching clinical judgment, new models of clinical education, and responding to needs for creating inclusive multicultural teaching-learning environments. NEW! Updated content throughout reflects the latest evidence-based guidelines for best practices in teaching and learning. NEW! UNIQUE chapter on Global Health and Curricular Experiences focuses on internationalization of the nursing curriculum with an emphasis on leading international learning experiences; policies, procedures, and guidelines for overseas study and global and health competencies for health professions programs. NEW! Enhanced pedagogy includes additional illustrations, tables, and boxes. NEW! Expanded interprofessional education chapter, provides you with strategies for effective teaching in an interprofessional healthcare environment.
