First published in 2003, The Cambridge Handbook of Social Sciences in Australia is a high-quality reference on significant research in Australian social sciences. The book is divided into three main sections, covering the central areas of the social sciences-economics, political science and sociology. Each section examines the significant research in the field, placing it within the context of broader debates about the nature of the social sciences and the ways in which institutional changes have shaped how they are defined, taught and researched.

This book is a research guide to the literatures of Australia and New Zealand. It contains references to many different types of resources, paying special attention to the unique challenges inherent in conducting research on the literatures of these two distinct but closely connected countries.

Australia's engagement with Asia from 1944 until the late 1960s was based on a sense of responsibility to the United Kingdom and its Southeast Asian colonies as they navigated a turbulent independence into the British Commonwealth. The circumstances of the early Cold War decades also provided for a mutual sense of solidarity with the non-communist states of East Asia, with which Australia mostly enjoyed close relationships. From 1967 into the early 1970s, however, Commonwealth Responsibility and Cold War Solidarity demonstrates that the framework for this deep Australian engagement with its region was progressively eroded by a series of compounding, external factors: the 1967 formation of ASEAN and its consolidation by the mid-1970s as the premier regional organisation surpassing the Asian and Pacific Council (ASPAC); Britain's withdrawal from East of Suez; Washington's de-escalation and gradual withdrawal from Vietnam after March 1968; the 1969 Nixon doctrine that America's Asia-Pacific allies must take up more of the burden of providing for their own security; and US rapprochement with China in 1972. The book shows that these profound changes marked the start of Australia's political distancing from the region during the 1970s despite the intentions, efforts and policies of governments from Whitlam onwards to foster deeper engagement. By 1974, Australia had been pushed to the margins of the region, with its engagement premised on a broadening but shallower transactional basis.

During the 1980s and early 1990s, both Australia and New Zealand extensively deregulated their economies, moving to become amongst the most liberal economies in the OECD. Shaun Goldfinch

interviewed more than 180 leading policy makers in Australia and New Zealand, including former prime ministers, ministers of finance, treasurers, public servants and other policy elites, and examined primary government sources to demonstrate the reasons and processes involved in this remarkable period of economic reform. This major comparative study sheds new light on economic policy-making and change, including the role of economic ideas and the importance of institutions and policy communities. It contrasts the 'crash through' approach that characterised reform in New Zealand with the 'bargained consensus' that underpinned changes in Australia. Finally it asks the critical question, 'Has the New Zealand approach to policy change delivered better policy outcomes?'

The Constitution of the Commonwealth of Australia examines the body of constitutional jurisprudence in an original and rigorous yet accessible way. It begins by exploring the historical and intellectual context of ideas surrounding the Constitution's inception, and closely examines its text, structure, principles and purposes in that light. The book then unpacks and critically analyses the High Court's interpretation of the Constitution in a manner that follows the Constitution's own logic and method of organisation. Each topic is defined through detailed reference to the existing case law, which is set out historically to facilitate an appreciation of the progressive development of constitutional doctrine since the Constitution came into force in 1901. The Constitution of the Commonwealth of Australia provides an engaging and distinctive treatment of this fundamental area of law. It is an excellent book for anyone seeking to understand the significance and interpretation of the Constitution.

Electoral systems matter. They are a crucial link in the chain connecting the preferences of citizens to the policy choices made by governments. They are chosen by political actors and, once in existence, have

political consequences for those actors. They are an important object of study for anyone interested in the political process, and in this book we subject them to systematic analysis. In addition to some comparative chapters, the book contains full accounts of the operation of electoral systems in 22 countries: France, the UK, Germany, Italy, Israel, Spain, Austria, Belgium, Denmark, Finland, The Netherlands, Ireland, Hungary, Russia, Australia, Canada, India, the USA, Japan, New Zealand, Chile, and South Africa. The book provides detailed analyses of the operation of a diverse set of electoral systems in their national context. Each chapter explains how the electoral system really works in the given country, examining the strategic incentives the system provides to voters, candidates, and parties. All country chapters have a common format and structure. Successive sections analyse: the institutional context; how each electoral system was chosen historically; how the current electoral system operates (the rules, mechanics, and ballot structure); and the political consequences of the current system (the impact on the party system, the internal life of parties, and the impact on parliament and government formation). Each country chapter then contains a final section which focuses on the politicization of electoral institutions. In recent years many countries have changed their electoral systems, either entirely or in part so there is a strong focus on the processes of electoral reform, both historically and prospectively. The book concentrates on the real world 'politics', as well as the 'political science' of electoral systems. The book will be of interest to those concerned with the practical political business of electoral reform. The book contains a wealth of evidence about the performance of various kinds of proportional representation and of non-PR systems. This will be invaluable for anyone interested in the question: 'What would be the best electoral system for my country?'

pioneering two-volume history of Australia's relations with the world, from the founding of the Commonwealth to the Great War and its immediate aftermath. This book is based on wide-ranging research in collections of personal and official papers in Australia, Britain, the United States and Canada and offers original insights into Australia's political culture. In taking the story up to the outbreak of the European conflict it shows the great impact that the looming presence of East Asia had on Australia's perception of the world and on the evolution of a distinctive defence and foreign policy.

The Search for Security in the Pacific 1901-1914 is the first volume in a pioneering two-volume history of Australia's relations with the world, from the founding of the Commonwealth to the Great War and its immediate aftermath. The outbreak of the European war found the Australians resentful about the British betrayal and anxious to know what the Empire's involvement in that conflict might mean for the Pacific. This divergence of security concerns created tension between Australia's community of culture and its community of interest, between its British identity and its geopolitical circumstances. In taking the story up to the outbreak of the European conflict it shows the great impact that the looming presence of East Asia had on Australia's perception of the world and on the evolution of a distinctive defence and foreign policy.
