Introductory spreads explain that bugs live nearly everywhere on Earth and give tips on how to become a young bug spotter. The book is divided into key groups of bugs, including beetles, moths, butterflies, bees, snails, crickets, grasshoppers, worms and spiders, all illustrated with scenic compositions. Some spreads approach the world of bugs thematically, such as bugs that come out at night, baby creepy-crawlies and life cycles, how bugs hide and show off and how some bugs love to live in your home. The text is chatty, funny and full of amazing facts.

Size is relative, but everything is worth seeing in this concept book from the illustrator of And Tango Makes Three—now available as a Classic Board Book. Beginning with a beautiful close-up of a “big” ladybug, this adorable board book artfully depicts the concept of scale as it zooms out from the bug, to a flower, to a cow, all the way to an expansive spread of sky. Then author Henry Cole masterfully zooms back in from that sky, to a tree, to a house, to a window, all the way to the end where an adorable dog is taking a “little” nap. Young readers will love the lush illustrations of the animals, objects, and scenery of a farm, and they'll delight in seeing how something “big” can suddenly seem “little” with every turn of a page!

Little bugs of all shapes and sizes show off their differences in rhyming text.
