most memorable players to have donned Boston's red, white and blue. Some, like Williams, enjoyed long, illustrious careers with the Red Sox. Others, like Smokey Joe Wood, shone brightly for only a brief period. Also included are journeymen who became legends as a result of one glorious World Series game, like Bernie Carbo, or players with just one memorable post-season appearance, like Dave Roberts. Together, these legends, idols, and heroes made Red Sox history and forever changed American baseball.

The first is a biographical dictionary of the 325 men who played in the National Association between 1871 and 1875, with their playing record, together with what we know of their other baseball experience and their lives beyond baseball. The book also contains a dictionary of the 25 clubs who participated in the league, showing their history, their management, their uniforms and logos, their home grounds, and their performance in the league. About 150 player photographs are included and each club entry has two or three supporting images (18 are historical maps). Bibliography and index.

Agitprop is the memoir of a Washington State maritime and steel worker who was a longtime activist in the American Federation of Labor, the Congress of Industrial Organizations, and the Communist Party. Born to a Massachusetts working class socialist family, Dennett is an idealist who sought to unify theoretical principle, policy, and practice in his daily life. His life story embodies broader themes that make this book an allegorical depiction of one man's journey through 20th century working-class America.

The golden key to understanding the last 75 years of American political development, the eminent labor relations scholar Michael Goldfield argues, lies in the contests between labor and capital in the American South during the 1930s and 1940s. Labor agitation and unionization efforts in the South in the New Deal era were extensive and bitterly fought, and ranged across all of the major industries of the region. In *The Southern Key*, Goldfield charts the rise of labor activism in each and then examines how and why labor organizers struggled so mightily in the region. Drawing from meticulous and unprecedented archival material and detailed data on four core industries—textiles, timber, coal mining, and steel—he argues that much of what is important in American politics and society today was largely shaped by the successes and failures of the labor movements of the 1930s and 1940s. Most notably, Goldfield shows how the broad-based failure to organize the South during this period made it what it is today. He contends that this early defeat for labor unions not only contributed to the exploitation of race and right-wing demagoguery in the South, but has also led to a decline in unionization, growing economic inequality, and an inability to confront and dismantle white supremacy throughout the US. A sweeping account of Southern political economy in the New Deal era, *The Southern Key* challenges the established historiography to tell a tale of race, radicalism, and betrayal that will reshape our understanding of why America developed so differently from other advanced industrial nations over the course of the last century.

However, 197 men played in their last big league contest at the age of 30 or younger. With a focus on the stories of 15 greats and near-greats, this book provides information on these 197 men. Why did their careers end so soon? The reasons are varied and include drug and alcohol abuse, suicide, illness, injury, banishment, and declining ability among others.
