My phone came in yesterday and I tried activating it. It says "SIM activation in progress" It's now 12:18 the next day and it still isn't active. The instructions on how to activate my phone tells me it would take around 20 minutes to activate. It's been a number of hours now. I try calling customer...

My Blackberry Q10 won't activate. Help - Verizon Community  
Got it working. Apparently having the integrated messaging as a feature causes a problem. BlackBerry phones do not support this and that was preventing the sim card from activating. Once that feature was removed from my Verizon account, I was able to move forward with the activation process. Using my Classic now and really enjoy it. Posted via CB10

Covering the latest trends and technology changes, this is the fully updated and revised bestselling guide to telecommunications for the nontechnical professional. Includes sections on convergence, globalization, speech recognition, and 3G cellular networks.

The Smartphone Paradox is a critical examination of our everyday mobile technologies and the effects that they have on our thoughts and behaviors. Alan J. Reid presents a comprehensive view of smartphones: the research behind the uses and gratifications of smartphones, the obstacles they present, the opportunities they afford, and how everyone can achieve a healthy, technological balance. It includes interviews with smartphone users from a variety of backgrounds, and translates scholarly research into a

conversational tone, making it easy to understand a synthesis of key findings and conclusions from a heavily-researched domain. All in all, through the lens of smartphone dependency, the book makes the argument for digital mindfulness in a device age that threatens our privacy, sociability, attention, and cognitive abilities.

This extraordinary book explains the engine that has catapulted the Internet from backwater to ubiquity—and reveals that it is sputtering precisely because of its runaway success. With the unwitting help of its users, the generative Internet is on a path to a lockdown, ending its cycle of innovation—and facilitating unsettling new kinds of control. iPods, iPhones, Xboxes, and TiVos represent the first wave of Internet-centered products that can't be easily modified by anyone except their vendors or selected partners. These

“ tethered appliances ” have already been used in remarkable but little-known ways: car GPS systems have been reconfigured at the demand of law enforcement to eavesdrop on the occupants at all times, and digital video recorders have been ordered to self-destruct thanks to a lawsuit against the manufacturer thousands of miles away. New Web 2.0 platforms like Google mash-ups and Facebook are rightly touted—but their applications can be similarly monitored and eliminated from a central source. As tethered appliances and applications eclipse the PC, the very nature of the Internet—its “ generativity, ” or innovative character—is at risk. The Internet's current trajectory is one of lost opportunity. Its salvation, Zittrain argues, lies in the hands of its millions of users. Drawing on generative technologies like Wikipedia that have so far survived their own successes, this book shows how to develop new
