A journey into one of the most fascinating minds alive today—guided by the owner himself. Bestselling author Daniel Tammet (*Thinking in Numbers*) is virtually unique among people who have severe autistic disorders in that he is capable of living a fully independent life and able to explain what is happening inside his head. He sees numbers as shapes, colors, and textures, and he can perform extraordinary calculations in his head. He can learn to speak new languages fluently, from scratch, in a week. In 2004, he memorized and recited more than 22,000 digits of pi, setting a record. He has savant syndrome, an extremely rare condition that gives him the most unimaginable mental powers, much like those portrayed by Dustin Hoffman in the film *Rain Man*. Fascinating and inspiring, *Born on a Blue Day* explores what it 's like to be special and gives us an insight into what makes us all human—our minds.

Traces the inspiring story of an autistic savant with genius-level mathematical talents, describing how he was eschewed by his classmates in spite of his near-photographic memory and super-human capacity for math and language, in a firsthand account that offers insight into how he experiences the world. Reprint. 100,000 first printing.

'I was born on 31 January 1979 - a Wednesday. I know it was a Wednesday, because the date is blue in my mind and Wednesdays are always blue, like the number nine or the sound of loud voices arguing.' Like the character Hoffman portrayed, he can perform extraordinary maths in his head, sees numbers as shapes, colours, textures and motions, and can learn to speak a language fluently from scratch in three days. He also has a compulsive need for order and routine. He eats exactly 45 grams of porridge for breakfast and cannot leave the house without counting the number of items of clothing he's wearing. If he gets stressed or unhappy he closes his eyes and counts. But in some ways Daniel is not all like the *Rain Man*. He is virtually unique amongst people who have severe autistic disorders in being capable of living a fully-functioning, independent life. It is this incredible self-awareness and ability to communicate what it feels like to live in a totally extraordinary way that makes *BORN ON A BLUE DAY* so powerful.

An eye-opening short book by the international bestselling writer of *Born on a Blue Day* and *Thinking in Numbers*. Have you ever wondered how neurotypicals - so called 'normal' people - come across to those who are on the autistic spectrum? What would an instruction manual about being an average human being look like to them? And actually, would it be that different, fundamentally, to a field guide about autistic people (were such a thing to exist)? Daniel Tammet is an essayist, poet, novelist and translator. In 2004, he was diagnosed with high-functioning autistic savant syndrome. In this eye-opening and fascinating book, he takes readers on a tour around nightclubs, ponders the significance of tattoos, delves into anti-age creams and puzzles over playing the lottery, all from the perspective of someone who approaches everything in life from a unique angle. After all, this is a man for whom Wednesdays are always blue, who sees numbers as shapes and who learned conversational Icelandic from scratch in seven days. These short essays come together in a beautifully written, sometimes humorous but always refreshing narrative that focuses on the eccentricities of modern life as seen through the eyes of someone always on the outside. Rather wonderfully, it illustrates the eccentricity inherent in every kind of mind, reminding us of the little-noticed strangeness of our common humanity, while subtly questioning what it means to be thought 'normal'.

NEW YORK TIMES BESTSELLER • “ As sweet and funny and sad and true and heartfelt a memoir as one could find. ” —from the foreword by Augusten

Burroughs Ever since he was young, John Robison longed to connect with other people, but by the time he was a teenager, his odd habits—an inclination to blurt out non sequiturs, avoid eye contact, dismantle radios, and dig five-foot holes (and stick his younger brother, Augusten Burroughs, in them)—had earned him the label “ social deviant. ” It was not until he was forty that he was diagnosed with a form of autism called Asperger ’ s syndrome. That understanding transformed the way he saw himself—and the world. A born storyteller, Robison has written a moving, darkly funny memoir about a life that has taken him from developing exploding guitars for KISS to building a family of his own. It ’ s a strange, sly, indelible account—sometimes alien yet always deeply human.

When you don't feel comfortable in your own skin, life can seem strange and foreign—you try to fit in, but with every new day comes a new challenge. Diagnosed with Asperger Syndrome, author Erica Hammerschmidt can relate. *Born on the Wrong Planet* is the story of her childhood and young adulthood coping with the challenges of Asperger Syndrome. The book started as a collection of stories, poems, and essays that Erika penned during high school. After high school as she studied abroad in Germany, Erika compiled them and created the first version of *Born on the Wrong Planet*. In the current revised and expanded edition of *Born on the Wrong Planet*, Erika takes us into the confusing and often tumultuous years of dating, and finally marriage to John, a young man who is also on the spectrum whom she met in college. Throughout, Erika's unique language skills and her fresh perspective on the world combine into a both delightful and enlightening read. In Erika's own words she shares that, "even if you feel like an alien, that doesn't negate your potential as a successful human being or your ability to realize your potential."

Do you have a real relationship with God, or do you just have a religion? Do you know God, or do you just know about God? In *How Big Is Your God?* Paul Coutinho, SJ, challenges us to grow stronger and deeper in our faith and in our relationship with God—a God whose love knows no bounds. To help us on our way, Coutinho introduces us to people in various world religions—from Hindu friends to Buddhist teachers to St. Ignatius of Loyola—who have shaped his spiritual life and made possible his deep, personal relationship with God.

“ Highly entertaining. ” —Adam Gopnik, *The New Yorker* “ Funny, curious, erudite, and full of useful details about ancient techniques of training memory. ” —*The Boston Globe* The blockbuster phenomenon that charts an amazing journey of the mind while revolutionizing our concept of memory An instant bestseller that is poised to become a classic, *Moonwalking with Einstein* recounts Joshua Foer's yearlong quest to improve his memory under the tutelage of top "mental athletes." He draws on cutting-edge research, a surprising cultural history of remembering, and venerable tricks of the mentalist's trade to transform our understanding of human memory. From the United States Memory Championship to deep within the author's own mind, this is an electrifying work of journalism that reminds us that, in every way that matters, we are the sum of our memories.

The irresistibly engaging book that "enlarges one's wonder at Tammet's mind and his all-embracing vision of the world as grounded in numbers" (Oliver Sacks, MD). *Thinking in Numbers* is the book that Daniel Tammet, mathematical savant and bestselling author, was born to write. In Tammet's world, numbers are beautiful and mathematics illuminates our lives and minds. Using anecdotes, everyday examples, and ruminations on history, literature, and more, Tammet allows us to share his unique insights and delight in the way numbers, fractions, and equations underpin all our lives. Inspired variously by the complexity of snowflakes, Anne Boleyn's eleven fingers, and his many siblings, Tammet explores questions such as why time seems to speed up as we age, whether there is such a thing as an average person, and how we can make sense of those we love. His provocative and inspiring new book will change the way you think about math and fire your imagination to view the world with fresh eyes.
