Creating a powerful and impactful survey is no easy feat; even experienced survey researchers struggle to eliminate bias and create robust questionnaire designs. Through case studies, real-life examples, and multiple data visualization graphics, Conducting Survey Research offers a unique how to guide on creating a survey. Throughout its seven chapters, the text enables readers to build relevant, unbiased, and purposeful survey questions. The text highlights common mistakes in survey research (e.g., using the appropriate sample size and survey administration mode), and demonstrates how to interpret survey data and report findings. While numerous online survey platforms exist, the text reviews features of some of the most popular ones to help readers decide which best meet their needs. The world of survey research is extensive. While this text offers a great introduction to the survey research world, it only covers the tip of the iceberg. For those interested in delving deeper into the topic, JAF Associates offers onsite, on-demand, instructor-led, and self-paced learning modules covering the content of this text, and more.

University start-ups are unique in the world of business and entrepreneurship, translating research conducted at and owned by universities into market-ready products--a complex process that requires a combination of scientific, technical, legal, business, and financial skills to be successful. Start-ups have the potential to generate revenue for universities, enhance faculty recruitment and retention, create jobs, and create investment opportunities for venture capitalists and entrepreneurs. Research to Revenue presents the first-ever comprehensive guide to understanding, starting, and managing university startups. By systematically describing the process of translating academic research into commercial enterprises, Don Rose and Cam Patterson give a thorough, process-oriented, and practical set of guidelines that cover not only best practices but also common--and avoidable--mistakes. They detail the key factors and components that contribute to a successful start-up, explain what makes university start-ups unique, delineate the steps of building and managing them, and describe how to foster and maintain start-ups at a university. Written for faculty and staff working on campus, tech-transfer officers, university administrators, and venture capitalists unfamiliar with university structures, Research to Revenue ensures that any reader unfamiliar with technology commercialization and entrepreneurship will understand the fundamentals of the process, including intellectual property rights, fund-raising, and business models. This work is an invaluable resource for the successful formation and well-managed operation of university start-ups.

Online student resource material can be accessed under the 'Support Materials' tab at <https://www.routledge.com/9780367207939> Doing Academic Research is a concise, accessible, and tightly organized overview of the research process in the humanities, social sciences, and business. Conducting effective scholarly research can seem like a frustrating, confusing, and unpleasant experience. Early researchers often have inconsistent knowledge and experience, and can become overwhelmed – reducing their ability to produce high quality work. Rather than a book about research, this is a practical guide to doing research. It guides budding researchers along the process of developing an effective workflow, where to go for help, and how to actually complete the project. The book addresses diversity in abilities, interest, discipline, and ways of knowing by focusing not just on the process of conducting any one method in detail, but also on the ways in which someone might choose a research method and conduct it successfully. Finally, it emphasizes accessibility and approachability through real-world examples, key insights, tips, and tricks from active researchers. This book is a highly useful addition to both content area courses and research methods courses, as well as a practical guide for graduate students and independent scholars interested in publishing their research.

Resourcing new ventures is all important for entrepreneurs, and creating a successful business plan can be make or break when it comes to attracting investment. Written by an experienced academic and consultant, this book provides a concise guide for producing the optimal business plan.
