This book examines prominent issues in the Emerging Markets (EM) from a variety of disciplines in order to make useful societal contributions through knowledge exchange. EMs offer enormous opportunities, but realizing them is both challenging and risky due to inherent uncertainties of such markets. EM's also

have unique characteristics that makes them different from developed countries. This causes implications for both theory and practice. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. This book investigates problems specific to emerging markets, and identifies new theoretical constructs, hypotheses (re)development, and emphasizes institutional contexts. The chapters in this book establish new conceptual and theoretical paradigms from multidisciplinary perspectives concentrated in the areas of information systems, electronic government, and digital and social media matters. The book focuses on topics in these areas such as digital enterprises, sustainability, telemedicine, and Information Communication Technology (ICT) and surveys the potential challenges and

opportunities that may arise. These concepts and topics covered in this book are vital for making the global economy more equitable and sustainable.

This book builds on the highly successful *Geography of Beer: Regions, Environment, and Society* (2014) and investigates the geography of beer from two expanded perspectives: culture and economics. The respective chapters provide case studies that illustrate various aspects of these themes. As the beer industry continues to reinvent itself and its economic and cultural geographies, this book showcases historical, current, and future trends at the local, regional, national, and international scales.

"The International Council for the Exploration of the Sea (ICES) is the central scientific network within the

massive set of bureaucracies that is responsible for Europe's Common Fisheries Policy (CFP). While spending the past 25 years failing to sustain Europe's fish stocks, this management system also became adept at making the lives of its scientists miserable. Now it is being confronted by the complex challenge of an ecosystem-based approach to fisheries management. If this combination of a multi-national bureaucracy, hard politics, and scientific uncertainty has made it impossible to maintain many individual fish stocks, how are decisions going to be made that consider everything from sea birds to climate change? The old political saw that "if you can't solve a problem, make it bigger" has never been put to a test like this! Yet ICES has begun to rise in an impressive way to the scientific challenge of providing advice for an ecosystem

approach within the world's most cumbersome fisheries management system. This book lays out the results of extensive sociological research on ICES and the decision making systems into which it feeds. ICES is finding ways to provide effective advice in the many situations where scientific advice is needed but a clear, simple answer is out of reach. In spite of the difficulties, scientists are beginning to help the various parties concerned with management to deal with facts about nature in ways that are more useful and transparent"--Publisher's description.

The play is about Wamala, a simple teacher whose job was 'thumbing pieces of chalk', who on the eve of independence, miraculously finds himself as a minister with all the associated luxuries befitting the office.

Describes the changes which led from colloquial Latin to the five major Romance languages: Spanish, French, Italian, Portuguese, and Romanian.

What is this book about? This book is about an exciting journey to Troy, both ancient and modern. About the fact that the Trojans defeated the Greeks (not the other way around, as is commonly believed). And that the well-known Greek religion with its anthropomorphism was created artificially for political reasons. The authors assert that the information warfare, the falsification of history — is not an innovation, but the oldest essence of Western way of thinking. The book refutes the conventional wisdom that "history is written by the winners." On the contrary, authors have shown: those who write history become winners. The book is

written in bright, vivid and interesting manner for laymen. At the same time it is absolutely scientific and opposed fancy sensational historical fast food. This book is about the struggle for historical truth and justice, which roots us in the world, because without the truth we are orphans.
