ICSE NumbersWiz is a series of books for KG to Class 8 which conforms to the latest CISCE curriculum. The main aim of writing this series is to help the children understand difficult mathematical concepts in a simple manner in easy language.

The educational process has undergone a sea of change in the last few years and has become more demanding than ever before. For more than two decades, Xam idea has helped thousands of students prepare for exams by providing hand-picked questions and solutions strictly in accordance with the CBSE syllabus.

Updated Lab activities, Group-activities, Worksheets, Projects, Mental Maths, Challengers (Tricky questions), MCQs, Chapter Test, Quick Review. Use of modern tools, gadgets and technology make these books more interesting and user friendly. Maths Alert has been updated at various places to point out the common mistakes

Composite Mathematics is a series of books for Pre Primer to Class 8 which conforms to the latest CBSE curriculum. The main aim of writing this series is to help the children understand difficult mathematical concepts in a simple manner in easy language.

In this must-have for anyone who wants to better understand their love life, a mathematician pulls back the curtain and reveals the hidden patterns from dating sites to divorce, sex to marriage behind the rituals of love. The roller coaster of romance is hard to quantify; defining how lovers might feel from a set of simple equations is impossible. But that doesn'll mean that mathematics is not a crucial tool for understanding love. Love, like most things in life, is full of patterns. And mathematics is ultimately the study of patterns from predicting the weather to the fluctuations of the stock market, the movement of planets or the growth of cities. These patterns twist and turn and warp and evolve just as the rituals of love do. In The Mathematics of Love, Dr. Hannah Fry takes the reader on a fascinating journey through the patterns that define our love lives, applying mathematical formulas to the most common yet complex questions pertaining to love: What Is the probability that it will last? How do online dating algorithms work, exactly? Can game theory help us decide who to approach in a bar? At what point in your dating life should you settle down? From evaluating the best strategies for online dating to defining the nebulous concept of beauty, Dr. Fry proves with great insight, wit, and fun It that math is a surprisingly useful tool to negotiate the complicated, often baffling, sometimes infuriating, always interesting, mysteries of love.

New Mathematics Today, a thoroughly revised series for KG to Class 8, has been designed as per the requirements of the latest curriculum. The content of this series is designed to reach all learners in the classroom irrespective of their skill levels or learning capabilities.

Contains large number of Solved Examples and Practice Questions. Answers, Hints and Solutions have been provided to boost up the morale and increase the confidence level. Self Assessment Sheets have been given at the end of each chapter tohelp the students to assess and evaluate their understanding of the concepts.
