New Orleans in Golden Age Postcards showcases over three hundred vintage postcard images of the city, printed in glorious color. From popular tourist attractions, restaurants, and grand hotels to local businesses, banks, churches, neighborhoods, civic buildings, and parks, the book not only celebrates these cards' visual beauty but also considers their historic value. After providing an overview of the history of postcards in New Orleans, Matthew Griffis expertly arranges and describes the postcards by subject or theme. Focusing on the period from 1900 to 1920, the book is the first to offer information about the cards' many publishers. More than a century ago, people sent postcards like we make phone calls today. Many also collected postcards, even trading them in groups or clubs. Adorned with colorized views of urban and rural landscapes, postcards offered people a chance to own images of places they lived, visited, or merely dreamed of visiting. Today, these relics remain one of the richest visual

records of the last century as they offer a glimpse at the ways a city represented itself. They now appear regularly in art exhibits, blogs, and research collections. Many of the cards in this book have not been widely seen in well over a century, and many of the places and traditions they depict have long since vanished.

During the Nineteenth-Century a major revival in religious pilgrimage took place across Europe. This phenomenon was largely started by the rediscovery of several holy burial places such as Assisi, Milano, Venice, Rome and Santiago de Compostela, and subsequently developed into the formation of new holy sites that could be visited and interacted with in a wholly Modern way. This uniquely wide-ranging collection sets out the historic context of the formation of contemporary European pilgrimage in order to better understand its role in religious expression today. Looking at both Western Catholic and Eastern Orthodox Europe, an international panel of contributors analyse the revival of some major Christian shrines, cults and pilgrimages that happened after the rediscovery of ancient holy burial sites or the constitution of new shrines in locations claiming apparitions of the Virgin Mary. They also shed new light on the origin and development of new sanctuaries and pilgrimages in France and the Holy Land during the Nineteenth Century, which led to fresh ways of understanding the pilgrimage experience and had a profound effect on religion across Europe. This collection offers a renewed overview of the development of Modern European pilgrimage that used intensively the new techniques of organisation and travel implemented in the Nineteenth-Century. As such, it will appeal to scholars of Religious Studies, Pilgrimage and Religious History as well as Anthropology, Art, Cultural Studies, and Sociology.

Capitalizes on the ripeness of the German case for interdisciplinary investigation

Compiles information and interpretations on the past 500 years of African American history, containing essays on historical research aids, bibliographies, resources for womens' issues, and an accompanying CD-ROM providing bibliographical entries.

"Advanced Statistics in Research: Reading, Understanding, and Writing Up Data Analysis Results" is the simple, nontechnical introduction to the most complex multivariate statistics presented in empirical research articles. "wwwStatsInResearch.com," is a companion website that provides free sample chapters, exercises, and PowerPoint slides for students and teachers. A free 600-item test bank is available to instructors. "Advanced Statistics in Research" does not show how to "perform" statistical procedures--it shows how to read, understand, and interpret them, as they are typically presented in journal articles and research reports. It demystifies the sophisticated statistics that stop most readers cold: multiple regression, logistic regression, discriminant analysis, ANOVA, ANCOVA, MANOVA, factor analysis, path analysis, structural equation modeling, meta-analysis--and more. "Advanced Statistics in Research" assumes that you have never had a course in statistics. It begins at the beginning, with research design, central tendency, variability, z scores, and the normal curve. You will learn (or re-learn) the big-three results that are common to most procedures: statistical significance, confidence intervals, and effect size. Step-by-step, each chapter gently builds on earlier concepts. Matrix algebra is avoided, and complex topics are explained using simple, easy-to-understand examples. "Need help writing up your results?" Advanced Statistics in Research shows how data-analysis results can be summarized in text, tables, and figures according to APA format. You will see how to present the basics (e.g., means and standard deviations) as well as the advanced (e.g., factor patterns, post-hoc tests, path models, and more). "Advanced Statistics in Research" is appropriate as a textbook for graduate students and upper-level undergraduates (see supplementary materials at StatsInResearch.com). It also serves as a handy shelf reference for investigators and all consumers of research.

Bringing together fourteen original essays, this collection opens up new perspectives on the architectural history of the nineteenth century by examining the buildings of the period through the lens of 'experience'. With a focus on the experience of the ordinary building user – rather than simply on the intentions of the designer – the book shows that new and important insights can be brought to our understanding of Victorian architecture. The chapters present a range of ideas and new research – some examining individual building case studies (from grand hotels and clubhouses in New York to the parliament buildings of Westminster), and others exploring conceptual questions about the nature of architectural experience, whether sensory or otherwise. Yet they share the premise that the idea of the 'experience of architecture' took on a new and particular significance with the rise of industrial modernity, and they examine what contemporary people – both architects and non-architects – understood by this idea. The insights in this volume extend beyond the study of Victorian architecture. Together they suggest how 'experience' might be used as a framework to produce a more convincingly historical account of the artefacts of architectural history.
