Reading Asian American and Latino literature, Bilingual Brokers traces the shift in attitudes toward bilingualism in postwar America from the focus on cultural assimilation to that of resource management. Interweaving the social significance of language as human capital and the literary significance of English as the language of cultural capital, Jeehyun Lim examines the dual meaning of bilingualism as liability and asset in relation to anxieties surrounding "new" immigration and globalization. Using the work of Younghill Kang, Carlos Bulosan, Américo Paredes, Maxine Hong Kingston, Richard Rodriguez, Chang-rae Lee, Julia Alvarez, and Ha Jin as examples, Lim reveals how bilingual personhood illustrates a regime of flexible inclusion where an economic calculus of one 's value crystallizes at the intersections of language and racial difference. By pointing to the nexus of race, capital, and language as the focal point of postwar negotiations of difference and inclusion, Bilingual Brokers probes the faultlines of postwar liberalism in conceptualizing and articulating who is and is not considered to be an American.

Fascinating look at the challenges faced by John F. Kennedy and Barack Obama in their quests to win the presidency.

"This collection of essays explores the authors' work in, inquiry into, and critique of online learning, educational technology, and the trends, techniques, hopes, fears, and possibilities of digital pedagogy."--back cover.

Archival research of any magnitude can be daunting. With this in mind, Alexis E. Ramsey, Wendy B. Sharer, Barbara L 'Eplattenier, and Lisa Mastrangelo have developed an indispensable volume for the first-time researcher as well as the seasoned scholar. Working in the Archives is a guide to the world of rhetoric and composition archives, from locating an archival source and its materials to establishing one 's own collection of archival materials. This practical volume provides insightful information on a variety of helpful topics, such as basic archival theory, processes, and principles; the use of hidden or digital archives; the intricacies of searching for and using letters and photographs;

strategies for addressing the dilemmas of archival organization without damaging the provenance of materials; the benefits of seeking sources outside academia; and the difficult (yet often rewarding) aspects of research on the Internet. Working in the Archives moves beyond the basics to discuss the more personal and emotional aspects of archival work through the inclusion of interviews with experienced researchers such as Lynée Lewis Gaillet, Peter Mortensen, Kathryn Fitzgerald, Kenneth Lindblom, and David Gold. Each shares his or her personal stories of the joys and challenges that face today 's researchers. Packed with useful recommendations, this volume draws on the knowledge and experiences of experts to present a well-rounded guidebook to the often winding paths of academic archival investigation. These in-depth yet user-friendly essays provide crucial answers to the myriad questions facing both fledgling and practiced researchers, making Working in the Archives an essential resource.

From its early days as the farmer's companion to over a quarter century as the nation's premier rock-and-roll station, WLS has touched the lives of millions of listeners. Many well-known celebrities, like Gene Autry, owe their careers to the Big 89, through the famous Saturday night program The National Barn Dance. Local personalities such as Dick Biondi, Larry Lujack, and John Records Landecker became household names thanks to Chicago's 50,000-watt blowtorch. The images in Chicago's WLS Radio scan the entire history of the station, featuring engaging hosts, the biggest stars, and lots of fun. The book also covers WLS's move in the 1990s to become a leader in the news and talk format.
