General Science Guide for Competitive Exams - NDA/ CDS/ Railways/ SSC/ UPSC/ Defence is a unique book which has been designed as per the trend of questions asked in previous years question papers of various competitive exams (SSC, CDS, Railways, NDA etc). In nutshell the book consists of complete theory of Physics, Chemistry, Biology and Science & Technology with MCQ Exercise including past questions of various exams. • Concepts in this book have been simplified in a way so that a non- science student can also understand the concepts easily. • Keeping general competitions in mind some topics related with general knowledge about science have also been included e.g. chemistry in the modern world, chemistry and the environment, modern physics, biotechnology etc. • The book also covers Science and technology in the development of India and its future prospects in the field of research. The part deals with Energy, Nuclear Technology, Information Technology, Space research, Communication and Defence. • In the text some interesting facts, Science in action and important formulae are highlighted. • The book is empowered with a variety of questions (Simple MCQs, Statement Based MCQs, Match the column MCQs, Assertion-Reason MCQs) and thus more than 4000 questions are included in the book. Solutions are also provided in the book. • Past MCQs of last ten year questions of various competitive exams have also been included in the book.

A proven guide to computer-aided machining, CNC Programming: Principles and Applications has been revised to give readers the most up-to-date information on G- and M- code programming available today. This edition retains the book's comprehensive yet concise approach, offering an overview of the entire manufacturing process, from planning through code writing and setup. is the new edition includes expanded coverage of tooling, manufacturing processes, print reading, quality control, and precision measurement. Designed to meet the needs of both beginning machinists and seasoned machinists making the transition to the abstract realm of CNC, this book is a valuable resource that will be referred to again and again. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

CSISE2011 is an integrated conference concentrating its focus upon Computer Science, Intelligent System and Environment. In the proceeding, you can learn much more knowledge about Computer Science, Intelligent System and Environment of researchers all around the world. The international conference will provide a forum for engineers, scientist, teachers and all researchers to discuss their latest research achievements and their future research plan. The main role of the proceeding is to be used as an exchange pillar for researchers who are working in the mentioned field. In order to meet high standard of Springer ?s Advances in Intelligent and Soft Computing ,the organization committee has made their efforts to do the following things. Firstly, poor quality paper has been refused after reviewing course by anonymous referee experts. Secondly, periodically review meetings have been held around the reviewers about five times for exchanging reviewing suggestions. Finally, the conference organization had several preliminary sessions before the conference. Through efforts of different people and departments, the conference will be successful and fruitful. We hope that you can get much more knowledges from our CSISE2011, and we also hope that you can give us good suggestions to improve our work in the future.
