cases of Poland and the GDR. Based on an interdisciplinary approach, including history, anthropology, cultural studies and sociology, the volume examines the mechanisms and processes that influence, determine and mint the private and public memory of communism in the post-1989 era. The common denominator to all essays is the emphasis on the process of remembering in the present, and the modalities by means of which the present perspective shapes processes of remembering, including practices of commemoration and representation of the past. The volume deals with eight major thematic blocks revisiting specific practices in communism such as

It has long been assumed that the historical legacy of Soviet Communism would have an important effect on post-communist states. However, prior research has focused primarily on the institutional legacy of communism. Communism's Shadow instead turns the focus to the individuals who inhabit post-communist countries, presenting a rigorous assessment of the legacy of communism on political attitudes. Post-communist citizens hold political, economic, and social opinions that consistently differ from individuals in other countries. Grigore Pop-Eleches and Joshua Tucker introduce two distinct

frameworks to explain these differences, the first of which focuses on the effects of living in a post-communist country, and the second on living through communism. Drawing on large-scale research encompassing post-communist states and other countries around the globe, the authors demonstrate that living through communism has a clear, consistent influence on why citizens in post-communist countries are, on average, less supportive of democracy and markets and more supportive of state-provided social welfare. The longer citizens have lived through communism, especially as adults, the greater their support for beliefs associated with communist ideology—the one

exception being opinions regarding gender equality. A thorough and nuanced examination of communist legacies' lasting influence on public opinion, Communism's Shadow highlights the ways in which political beliefs can outlast institutional regimes.

Despite its key role in the intellectual shaping of state socialism, Communist ideas are often dismissed as mere propaganda or as a rhetorical exercise aimed at advancing socialist intellectuals on their way to power. By drawing attention to unknown and unexplored areas, trends and ways of thinking under socialism, the volume examines Eastern Europe and Russian

histories of intellectual movements inspired - negatively as well as positively - by Communist arguments and dogmas. Through an interdisciplinary dialogue, the collection demonstrates how various bodies of theoretical knowledge (philosophical, social, political, aesthetic, even theological) were used not only to justify dominant political views, but also to frame oppositional and nonofficial discourses and practices. The examination of the underlying structures of Communism as an intellectual project provides convincing evidence for questioning a dominant approach that routinely frames the post-Communist intellectual development as a

'revival' or, at least, as a 'return' of the repressed intellectual traditions. As the book shows, the logic of a radical break, suggested by this approach, is in contradiction with historical evidence: a significant number of philosophical, theoretical and ideological debates in post-Communist world are in fact the logical continuation of intellectual conversations and confrontations initiated long before 1989.

A spirited, deeply researched exploration of why capitalism is bad for women and how, when done right, socialism leads to economic independence, better labor conditions, better work-life balance and, yes, even better sex. In a witty, irreverent op-ed

piece that went viral, Kristen Ghodsee argued that women had better sex under socialism. The response was tremendous -- clearly she articulated something many women had sensed for years: the problem is with capitalism, not with us. Ghodsee, an acclaimed ethnographer and professor of Russian and East European Studies, spent years researching what happened to women in countries that transitioned from state socialism to capitalism. She argues here that unregulated capitalism disproportionately harms women, and that we should learn from the past. By rejecting the bad and salvaging the good, we can adapt some socialist ideas to the 21st century and improve our lives.

She tackles all aspects of a woman's life - work, parenting, sex and relationships, citizenship, and leadership. In a chapter called "Women: Like Men, But Cheaper," she talks about women in the workplace, discussing everything from the wage gap to harassment and discrimination. In "What To Expect When You're Expecting Exploitation," she addresses motherhood and how "having it all" is impossible under capitalism. Women are standing up for themselves like never before, from the increase in the number of women running for office to the women's march to the long-overdue public outcry against sexual harassment. Interest in socialism is also on the rise - whether it's the popularity
