~~Desktop Applications (Visual C++) 07/28/2019; 4 minutes to read +7; In this article. A desktop application in C++ is a native application that can access the full set of Windows APIs and either runs in a window or in the system console. Desktop applications in C++ can run on Windows XP through Windows 10 (although Windows XP is no longer officially supported and there are many Windows APIs that have been introduced since then).~~

Desktop Applications (Visual C++) | Microsoft Docs

Describes the project and item templates that Visual Studio provides to help you build apps for Windows 10 devices by using C# or C++.
