"The best way to predict the future is to invent it." –Mark Cuban, How to Win at the Sport of Business Discover a winning idea, launch your business, and start making money today! Do you think it would be cool to run your own business? Do you want to help people with everyday problems? Do you want to make money? Then you could be an entrepreneur! You don't have to be a grownup to launch your start-up. We'll show you how to discover a great business idea and get it off the ground. You can try one of our ten kid-friendly businesses, including timeless ventures like starting a lemonade stand to more modern-day endeavors like launching an Etsy art store, or create your own. Because every billionaire was once a kid with great ideas—just like you!

Finger plays, jingles, and musical games provide entertainment for the nursery.

Go on the trip of a lifetime. Two Wheels South shows you how to realize your own journey. Two friends take the motorcycle trip of their life--From Brooklyn to Patagonia. Matias Corea shares his insights on how to prepare, choose the right motorcycle, what to pack, how to plan the route, where to camp and last but not least: How to prepare your mind. Setbacks and breaking down are part of the adventure, but preparation and being on the road teach you the confidence to tackle any problem. Follow Matias Corea and his friend Joel through the American South, Central America over the Darien Gap and beyond, over wooden cracking jungle bridges in Colombia and to dry lake high plateaus in Argentina. Feel the character of the roads and the smell of nature: Riding a motorcycle is one of the purest forms of traveling. After 7 months and 13 countries Matias and Joel have learned a lot while riding down south on their trusty BMW air-cooled G / S overland haulers and are ready to share their experience. Two Wheels South invites you on the experience of a lifetime.

What made the Sopranos finale one of the most-talked-about events in television history? Why is sudoku so addictive and the iPhone so darn irresistible? What do Jackson Pollock and Lance Armstrong have in common with theoretical physicists and Buddhist monks? Elegance. In this thought-provoking exploration

of why certain events, products, and people capture our attention and imaginations, Matthew E. May examines the elusive element behind so many innovative breakthroughs in fields ranging from physics and marketing to design and popular culture. Combining unusual simplicity and surprising power, elegance is characterized by four key elements—seduction, subtraction, symmetry, and sustainability. In a compelling, story-driven narrative that sheds light on the need for elegance in design, engineering, art, urban planning, sports, and work, May offers surprising evidence that what's "not there" often trumps what is. In the bestselling tradition of *The Tipping Point*, *Made to Stick*, and *The Black Swan*, *In Pursuit of Elegance* will change the way you think about the world.

Offers a collection of true facts about animals, food, science, pop culture, outer space, geography, and weather.

In this book, philosopher Keekok Lee challenges one of the central assumptions of contemporary environmentalism: that if we could reduce or eliminate pollution we could 'save' the planet without unduly disrupting our modern, industrialized societies. Lee argues instead that the process of modernization, with its attendant emphasis on technological innovation, has fundamentally transformed 'nature' into just another manmade 'artefact.' Ultimately, what needs to be determined is if nature has value above and beyond human considerations, whether aesthetic, spiritual, or biological. This provocative book attempts to reconfigure environmental ethics, positing the existence of two separate ontological categories—the 'natural' and the 'artefactual.' Natural entities, be they organisms or inert matter, are 'morally considerable' because they possess the ontological value of independence, whereas artefacts are created by humans expressly to serve their own interests and ends.

Probably a first in the field since *Elements of Ordnance* by Haynes, published in the 1900's, this is a book with a practical and up to date approach to a complex subject. Intended for the mechanical engineer concerned with large calibre gun engineering, it puts mechanical engineering and weapon uniqueness into clear perspective and prepares the groundwork for the intricacies of gun design. A wealth of engineering information is covered in seven chapters, including, gun barrels, breech assemblies, recoil systems, muzzle brakes, supporting structures, elevating and traversing mechanisms and balancing. The analyses contained in each chapter are illustrated by worked examples supported by straightforward computer applications. In all, a valuable book for both teacher and student in a field where published works are almost impossible to come by. This volume found acceptance as a text book and reference material at colleges in the US, Canada, UK, Spain, Germany, Finland and Czechslovakia

Presents Islamic stories that offer a background in Islamic traditions, folk tales, and mystical verse.

The Psalms is a beautiful presentation of this beloved section of Scripture in large, readable type on high-quality paper. Featuring the ESV text, this edition is great for devotions, liturgical use, or as a gift.

You might have heard of the basilisk and the griffin, but what about the basiffin? This fantastical flipbook collects together magical and mythical creatures from all over the world, then lets you mix and match their fronts and backs to create even more wondrous beasts of your own! From the wolpertinger and nekomata to the thunderbird and the cockatrice, this mixed-up magical bestiary has over 1,000 possible creations to fascinate, bewitch, and beguile.
