"The ancient Egyptians were firmly convinced of the importance of magic, which was both a source of supernatural wisdom and a means of affecting one's own fate. The gods themselves used it for creating the world, granting mankind magical powers as an aid to the struggle for existence. Magic formed a link between human beings, gods, and the dead. Magicians were the indispensable guardians of the god-given cosmic order, learned scholars who were always searching for the Magic Book of Thoth, which could explain the wonders of nature. Egyptian Magic, illustrated with wonderful and mysterious objects from European museum collections, describes how Egyptian sorcerers used their craft to protect the weakest members of society, to support the gods in their fight against evil, and to imbue the dead with immortality, and explores the arcane systems and traditions of the occult that governed this well-organized universe of ancient Egypt."--Publisher's website.

A lively survey encompassing the Orient, the Americas, and the classical world From the Olympic Games of Greece to the gladiatorial contests of Rome, sport in the ancient world was fiercely competitive and included a wider range of physical contests than we moderns might suspect. The early Chinese played forms of polo and golf, while half a world away, Hohokam and Maya Indians enjoyed team ball games. Nigel Crowther, a leading authority on classical Greek sport, here casts his net over the entire ancient world to reveal the variety, and often the intensity, of sport in earlier times, from 3000 b.c.e. to the Middle Ages. Taking in twenty premodern societies on five continents—with particular emphasis on ancient Greece and Rome and the Byzantine Empire—he traces connections to modern sporting attitudes, practices, and institutions as he describes how athletics figured in cultural arenas that extended beyond physical prowess to ritual, social status, military associations, and politics. Crowther takes us back to the birth of sumo wrestling in Japan and describes the sports of the Sumerians and Hittites. He documents bull leaping and boxing as recorded on pottery in Crete, as well as running and archery as practiced by the pharaohs in Egypt. He shows the significance of the early Olympic Games, describes the Romans' use of gladiatorial contests for political ends, and analyzes the influence of Byzantine chariot racing on society. He also notes the changing role of women in ancient sports—from their prominence in Egyptian contests, to the mythological Atalanta, to female Roman gladiators. As informative as it is entertaining, Sport in Ancient Times opens new vistas for general readers, students, and sport historians. It offers a broad look at ancient sport and will enrich readers' appreciation of games they enjoy today.
