Fundamentals of Earthquake Engineering combines aspects of engineering seismology, structural and geotechnical earthquake engineering to assemble the vital components required for a deep understanding of response of structures to earthquake ground motion, from the seismic source to the evaluation of actions and deformation required for design. The nature of earthquake risk assessment is inherently multi-disciplinary. Whereas Fundamentals of Earthquake Engineering addresses only structural safety assessment and design, the problem is cast in its appropriate context by relating structural damage states to societal consequences and expectations, through the fundamental response quantities of stiffness, strength and ductility. The book is designed to support graduate teaching and learning, introduce practicing structural and geotechnical engineers to earthquake analysis and design problems, as well as being a reference book for further studies. Fundamentals of Earthquake Engineering includes material on the nature of earthquake sources and mechanisms, various methods for the characterization of earthquake input motion, damage observed in reconnaissance missions, modeling of structures for the purposes of response simulation, definition of performance limit states, structural and architectural systems for optimal seismic response, and action and deformation quantities suitable for design. The accompanying website at www.wiley.com/go/elnashai contains a comprehensive set of slides illustrating the chapters and appendices. A set of problems with solutions and worked-through examples is available from the Wley Editorial team. The book, slides and problem set constitute a tried and tested system for a single-semester graduate course. The approach taken avoids tying the book to a specific regional seismic design code of practice and ensures its global appeal to graduate students and practicing engineers.

Let your quilting creativity soar with these magical machine techniques! Are you using your sewing machine to its fullest creative capacity? Do you know what each foot can do? Expand your repertoire with machine techniques, embellishment, surface design, and thread painting skill, thanks to your sewing machine. Nine highly qualified, experienced sewing machine educators have developed 13 delightful projects to show you how to make the most of your machine's technical possibilities. From pillows to bed scarves, from wallhangings to table runners, any quilt will benefit when its creator uses these techniques.

Helps you learn how to use your embroidery machine to its fullest potential. This title contains tips and techniques for producing creative designs.

Biography of Frank Lutz, researcher in genetics, who conducted a lengthy and unusual study on the common fruit fly.

This book constitutes the refereed proceedings of the 12th International Conference on Algorithms and Computation, ISAAC 2001, held in Christchurch, New Zealand in December 2001.The 62 revised full papers presented together with three invited papers were carefully reviewed and selected from a total of 124 submissions. The papers are organized in topical sections on combinatorial generation and optimization, parallel and distributed algorithms, graph drawing and algorithms, computational geometry, computational complexity and cryptology, automata and formal languages, computational biology and string matching, and algorithms and data structures.

The classic tale of Roland and May-Bird and The Three Children of Fortune is illustrated in colour and black and white by English illustrator John Hassall. Here he shows his wonderful poster style that so suits children's books. A wonderful book to add to any child's collection. Pook Press are reprinting this book for adults and children to enjoy once again.

Alex Bell, a successful financial trader, married with a young family, gets recruited by a striking Master of the Universe type, named Chris Barma, to work in Jeddah, Saudi Arabia in the late 1990s. Alex has another reason for his career move as a spiralling out of control affair with a difficult and emotionally vulnerable French woman threatens to turn his life upside down. The move brings him into the cosseted and extraordinary lifestyle of pre 9/11 expatriate life in Saudi Arabia. Despite serious misgivings, Alex presses on and meets an array of characters in the cosmopolitan goldfish bowl of a Western compound. He and his new friend Jim Robson, go on a boat trip with a rich Saudi. A diving accident occurs and Alex and his friend save the life of a young Saudi named Mohammed, the son of one of his colleagues, an action that has extraordinary consequences...
