When a geopolitical miscalculation taints the world's remaining oil fields, America captures a passing asteroid as an alternate fuel, compelling NASA engineer Marcus to go into space to combat an international cabal.

Energized -- a cautionary science-based thriller by Edward M. Lerner, the acclaimed coauthor of *Betrayer of Worlds* No one expected the oil to last forever. How right they were.... A geopolitical miscalculation tainted the world's major oil fields with radioactivity and plunged the Middle East into chaos. Any oil that remains usable is more prized than ever. No one can build solar farms, wind farms, and electric cars quickly enough to cope. The few countries still able to export oil and natural gas--Russia chief among them--have a stranglehold on the world economy. And then, from the darkness of space, came Phoebe. Rather than divert

the onrushing asteroid, America captured it in Earth orbit. Solar power satellites--cheaply mass-produced in orbit with resources mined from the new moon to beam vast amounts of power to the ground--offer America its last, best hope of avoiding servitude and economic ruin. As though building miles-across structures in space isn't challenging enough, special interests, from technophobes to eco-extremists to radio astronomers, want to stop the project. And the remaining petro powers will do anything to protect their newfound dominance of world affairs. NASA engineer Marcus Judson is determined to make the powersat demonstration project a success. And he will--even though nothing in his job description mentions combating an international cabal, or going into space to do it.

employees and ensure the business outperforms the competition. It covers everything from why existing structures are causing business output to decline, why traditional processes are holding organizations back and what the consequences of not addressing these design issues will mean for business including increased staff turnover, a rise in employee absence and a decline in company profits. Including case studies from organizations across a range of sectors who have successfully put people at the heart of their workplace design such as CyberClick, Mind Valley, Brewdog and Wegmans and with specific guidance on designing for five generations working side by side, across different countries and on separate time zones, The Energized Workplace will help OD and HR professionals confidently tackle the organizational issues putting their company success and employee health and happiness in jeopardy. This book is essential reading for practitioners needing to deal with the wellbeing crisis and productivity puzzle in the new world of work.

This Book is a sequel to my first Book “ The Shocking ” , all of my writings are written in a Non-Traditional style so that my audience can digest what is being said more easily and quickly. There by shocking the consciousness of those that reads it, rather they believe it or not. I do not believe in giving the readers a long diatribe on a subject that takes only a few words to get the point across. I think the readers would appreciate reading something that is clear and to the point without a long drawn out story that would take you around the world to express the thought. I am very blunt about the things I research and write about, the fact of the matter is that “ Energy ” gives us the ability to think and to think wisely. I think very deeply about the things I write about. I pick and choose the top-pics based on what I see and feel. Like twitter, you can say what you want in a sentence or paragraph to send a message; I have chosen short articles for my message.
