"Have you ever found yourself stretched too thin? Do you simultaneously feel overworked and underutilized? Are you often busy but not productive? Do you feel your time is constantly being hijacked by other people's agendas? If you answered yes to any of these questions, the way out is the way of the Essentialist. Essentialism isn't about getting more done in less time. It's about getting only the right things done. Only once we discern what is absolutely essential and eliminate everything else can we make our highest possible contribution toward things that truly matter. By forcing us to apply more selective criteria for where to spend our precious time and energy, the disciplined pursuit of less empowers us to reclaim control of our own choices, instead of giving others the implicit permission to choose for us. Essentialism is not one more thing to do. It's a whole new way of doing less, but better, in every area of our lives"--Back cover.

" ... a must read for those wanting to craft a vocation in finance. " -- Adrian Gore, CEO, Discovery Group; " ... no better book for a student or practitioner who wants more than is usually on offer in finance courses in our universities. " -- Paul Oslington, Professor of Economics and Dean of Business, Alphacrucis College, Sydney. To develop a vocation we ask: what do I want to be remembered for? This involves aspiring to personal integrity and a life well lived. Those working in the financial sector fulfill vocations by finding ways to serve social purposes, to allocate resources efficiently and to provide financial security—while remembering the needy. This means contributing to institutions, where people can flourish personally and create appropriate products and services. The ethics of those working on finding their vocation do not flow from rules and obligations, but from a personal commitment to seeking what is good. This life is based on the fundamental personal virtue, integrity. This book is written for those who aspire to the cultivation of the personal virtues of wisdom, self-control, courage, and justice.

M&A failures is an established phenomenon. Human factors, such as acceptance of and readiness for change at the individual level, conflict of interest and cultural incompatibility are the key attributes of the success or failure of a merger or transformational change. Balancing theory with practice, this book looks at the financial due diligence, cultural compatability, and emotional sensitivity at various stages of the M&A and offers a practical process model. Business leaders, change agents, coaching and mentoring practitioners will find the rare combination of great interest.

Developing Successful Business Strategies presents effective planning of business strategies and related budgeting concepts, and those activities necessary for the successful growth of the organization. The planning process is shown to be an integral function of developing management strategies for future growth and the gaining of competitive advantage in these fast moving times. Budgeting is presented as a logical outgrowth and an essential part of the planning process, rather than an independent internal activity. This book emphasizes the principal factors that should be considered in planning and budgeting for the company, what management and operations personnel must know to better understand effective planning for the business, and what can be done to enhance the overall strategic and financial planning for the organization. Inside, you ' ll learn of the relationship between effective planning methods (long-term and short-term) and the budgeting and control processes. We will also explore the interaction and interdependence of strategic planning (long and short term), detail planning, budgeting, and monitoring processes, and will demonstrate how planning is an essential first step in the preparation of an effective budget for the organization.
