"These notes are about the process of design: the process of inventing things which display new physical order, organization, form, in response to

Download File

PDF Ford

Expedition Engine Diagram

function." This book, opening with these words, presents an entirely new theory of the process of design. In the first part of the book, Christopher Alexander discusses the process by which

Download File

PDF Ford

Expedition
Engine Diagram

a form is adapted to the context of human needs and demands that has called it into being. He shows that such an adaptive process will be successful only if it proceeds piecemeal instead of all

Download File

PDF Ford

at once. It is for this reason that forms from traditional un-self-conscious cultures, molded not by designers but by the slow pattern of changes within tradition, are so beautifully organized and adapted. When

Download File

PDF Ford

the designer, in
our own self-
conscious

culture, is
called on to
create a form
that is adapted
to its context
he is

unsuccessful,
because the
preconceived
categories out
of which he

Download File

PDF Ford

Expedition
Engine Diagram

builds his picture of the problem do not correspond to the inherent components of the problem, and therefore lead only to the arbitrariness, willfulness, and lack of understanding which plague the

Download File

PDF Ford

design of modern
buildings and
modern cities.

In the second
part, Mr.
Alexander
presents a
method by which
the designer may
bring his full
creative
imagination into
play, and yet
avoid the traps

Download File

PDF Ford

of irrelevant
preconception.
He shows that,
whenever a
problem is
stated, it is
possible to
ignore existing
concepts and to
create new
concepts, out of
the structure of
the problem
itself, which do

Download File

PDF Ford

Expedition
Engine Diagram

correspond
correctly to
what he calls
the subsystems
of the adaptive
process. By
treating each of
these subsystems
as a separate
subproblem, the
designer can
translate the
new concepts
into form. The

Download File

PDF Ford

form, because of the process, will be well-adapted to its context, non-arbitrary, and correct. The mathematics underlying this method, based mainly on set theory, is fully developed in a long appendix.

Download File

PDF Ford

Another appendix demonstrates the application of the method to the design of an Indian village.
