This edition focuses on concepts that are isolated in a logical sequence. It explains how accountants manipulate financial statements, discusses the three common features of criminal and ethical misconduct including opportunity, pressure and rationalization, and much more.

Fundamental Managerial Accounting Concepts 9e, by Edmonds/Edmonds/Tsay/Olds focuses on the development of decision-making skills and helping students truly understand the underlying principles of accounting, not just memorize content. Pedagogical innovations, like the unique Horizontal Financial Statements Model and a multiple accounting cycle approach that demonstrates the impact of related events over a series of accounting cycles, ensure students understand the true application of accounting in business. The text is organized in a coherent, integrative framework that enables students to build knowledge in stepwise fashion, focusing on real-world examples and international issues, with both "A Look Back" and "A Look Forward" to ensure content is current and relevant.
