The second edition of this ground-breaking book continues the mission of its predecessor: to provide a "best principles" and "best practices" overview of the counseling supervision process, one that is firmly rooted in the recent explosion of empirical research in this field. Sponsored

by the Association for Counselor  
Education and Supervision (ACES), the  
presentation is targeted primarily at  
master's-level practitioners who want  
"how-to" applications of the research  
literature (with examples) rather than a  
comprehensive review of the supervision  
literature. Like the first edition, this

revised book is also a useful supplement for more academic texts used for doctoral-level instruction in counseling supervision. Key changes in this new edition include greater attention to multicultural and diversity issues and new chapters on group supervision and on technology. Also new are discussion questions and vignettes

framework to promote students' learning and a practical, true-to-life approach for organizing the course. For each disorder (across descriptions of clinical presentation, course, and treatment), Parritz and Troy emphasize the continuity between typical and atypical development; risk and resilience; complex models of

psychopathology; children in relationships over time; children in larger social contexts (e.g., neighborhoods); and the holistic nature of development (e.g., thinking about the child's abilities and strengths as well as his or her disorder). Updated with more coverage of neuroscience research and greater
