Covering New York, American & regional stock exchanges & international companies.

The most comprehensive hazmat emergency response training manual following NFPA and OSHA competency criteria The choice of firefighters and other rapid response personnel for years, this user friendly manual helps first responders build their skills step-by-step to professionally handle any hazmat emergency. Organized to enhance understanding and retention—and reinforced with copious illustrations, photographs, learning exercises, and case studies—this book takes the reader from preplanning to dispatch to the stabilization of an incident, and on to post-incident critique and follow-up. New material addresses advances in protective clothing, new products for confinement and containment, and changes in the OSHA Respiratory Protection Standard, plus much more. Additional chapters cover WMDs, with sections specific to WMD response including site control, personal protective equipment, and decontamination.

The EnviroTIPS series of manuals was developed to fill a need for in-depth spill countermeasures and strategy planning information for top priority substances. Each manual is intended as a monograph containing information relevant to its behaviour, ntrol, dispersion, effects, and cleanup of spills. The emphasis is on environmental effects, and the focus is on Canadian conditions from material, legislative and climatic standpoints. General principles of spill response are not discussed; rather, the available literature is summarized as it relates to a specific substance and to spillsof that substance. This manual is an introduction, outlining the intent and direction of each section; it provides the necessary theoretical bases for calculations included in each manual. In addition, the definitions of the terms appearing in EnviroTIPS manuals are given.
