From the "guru to Wall Street's gurus" comes the fundamental techniques of value investing and their applications Bruce Greenwald is one of the leading authorities on value investing. Some of the savviest people on Wall Street have taken his Columbia Business School executive education course on the subject. Now this dynamic and popular teacher, with some colleagues, reveals the fundamental principles of value investing, the one investment technique that has proven itself consistently over time. After covering general techniques of value investing, the book proceeds to illustrate their applications through profiles of Warren Buffett, Michael Price, Mario Gabellio, and other successful value investors. A number of case studies highlight the techniques in practice. Bruce C. N. Greenwald (New York, NY) is the Robert Heilbrunn Professor of Finance and Asset Management at Columbia University. Judd Kahn, PhD (New York, NY), is a member of Morningside Value Investors. Paul D. Sonkin (New York, NY) is the investment manager of the Hummingbird Value Fund. Michael van Biema (New York, NY) is an Assistant Professor at the Graduate School of Business, Columbia University.

A firm introduction to value investing offers a comprehensive overview of the inner workings of this popular wealth-building strategy, examining the principles behind the process and how to use its techniques to achieve exceptional investment returns, even in today's turbulent market.

An accessible introduction to the proven method of value investing An ardent follower of Warren Buffett—the most high-profile value investor today—author Charles Mizrahi has long believed in the power of this proven approach. Now, with Getting Started in Value Investing, Mizrahi breaks down this successful strategy so that anyone can learn how to use it in his or her own investment endeavors. Written in a straightforward and accessible style, this book helps readers gain an overall understanding of the value approach to investing and presents statistics that reveal the overwhelming success of this approach through a variety of markets. Engaging and informative, Getting Started in Value Investing skillfully shows readers how to look for undervalued companies and provides them with the tools they need to succeed in today's markets. Charles S. Mizrahi (Brooklyn, NY) is Managing Partner of CGM Partners Fund LP. He is also editor of Hidden Values Alert, a monthly newsletter focused on value investing. Mizrahi has more than 25 years of investment experience and is frequently quoted in the press. Many of his articles appear online at gurunofocus.com as well as on other financial sites.

There are many ways to make money in today ' s market, but the one strategy that has truly proven itself over the years is value investing. Now, with The Little Book of Value Investing, Christopher Browne shows you how to use this wealth-building strategy to successfully buy bargain stocks around the world.

My personal goal is to help people reach their financial goals. One way of doing that is through investing education. The book is my attempt to help with the development of a strong investing mindset and skillset to help you make better investment decisions. There is a gap in the value investing world. Benjamin Graham published The Intelligent Investor in 1949 with several subsequent editions up to 1972, while Seth Klarman published Margin of Safety in 1991. With more than 50 years since Graham published his masterpiece and almost 30 since Klarman's, there was the need for a contemporary book to account for all the changes in the financial environment we live in. Modern Value Investing book does exactly that, in 4 parts.Part 1 discusses the most important psychological traits a successful investor should have. Part 2 describes 25 tools that help with investment analysis.Part 3 applies those tools on an example. Part 4 is food for investing thought as it discusses modern approaches to investing. Approaches range from an all-weather portfolio strategy to hyperbolic discounting and others you can take advantage of when the time is right.

Benjamin Graham referred to it as his " margin of safety. " Seth Klarman favors it over all other investment methods. Warren Buffett uses it to make millions for his investors. It ' s called value investing, and you can make it work wonders for your portfolio. All you need is money to invest, a little patience—and this book. Strategic Value Investing reveals everything you need to know to build a world-class portfolio using value investing as your north star. Written by experts on valuation and financial analysis, this comprehensive guide breaks it all down into an easy-to-implement process. The authors explain the ins and outs of determining when a stock is undervalued, then purchasing it and selling it for a profit when the rest of the world learns what you knew all along. With Strategic Value Investing, you ' ll learn how to: Distinguish between the various measures of value, including going concern, replacement value, fair market value, book value, and intrinsic value Identify undervalued companies before everyone else, and know what to look for, what to avoid, when to buy, and when to sell The authors teach you how to establish a dispassionate value investing philosophy tailored to your needs. Equally important, they provide the tools you need to adhere to this often contrarian approach regardless of your emotions or crowd sentiment. Get in before the crowd—and get out when the price is right with Strategic Value Investing. Praise for Strategic Value Investing " A book that has much the same character as a good value investor: calm, disciplined, with a grasp both of broad theory and of how to apply it. " —JOHN AUTHERS, senior investment columnist, Financial Times " This comprehensive look at valuation techniques is not only insightful, but can be easily put to use by individual and professional investors alike. " —CHARLES ROTBLUT, CFA, Vice President, the American Association of Individual Investors " Offers a sound fundamental perspective for those looking to deepen their analysis around stocks. A great resource for all types of value investors. " —HEATHER BRILLIANT, CFA, global head of equity research at Morningstar and member of the CFA Institute Board of Governors " This book is of Real Value! It updates the pioneering work of Ben Graham and Phillip Fisher, blending the valuation techniques of the masters (such as Warren Buffett) and provides institutional and individual investors the A to Z of value investing from a practitioner perspective. " —JOHN MAGINN, CFA, EVP & CIO, Mutual of Omaha (retired) and coeditor of Managing Investment Portfolios " An actionable road map for implementing a disciplined value investing strategy. Very much in the Ben Graham style. The sophisticated individual investor will find this comprehensive digest a continual and timeless reference. " —WALLACE FORBES, CFA, President of Forbes Investors Advisory Institute, Division of Forbes magazine " Many books propose to help you learn how to become a better value investor. This one, which is bound to become a staple of every value investor ' s library, delivers on its promise. " —ROBERT POWELL, editor of Retirement Weekly and columnist of " MarketWatch "

The economic climate is ripe for another golden age of shareholder activism Deep Value: Why Activist Investors and Other Contrarians Battle for Control of Losing Corporations is a must-read exploration of deep value investment strategy, describing the evolution of the theories of valuation and shareholder activism from Graham to Icahn and beyond. The book combines engaging anecdotes with industry research to illustrate the principles and methods of this complex strategy, and explains the reasoning behind seemingly incomprehensible activist maneuvers. Written by an active value investor, Deep Value provides an insider's perspective on shareholder activist strategies in a format accessible to both professional investors and laypeople. The Deep Value investment philosophy as described by Graham initially identified targets by their discount to liquidation value. This approach was extremely effective, but those opportunities are few and far between in the modern market, forcing activists to adapt. Current activists assess value from a much broader palate, and exploit a much wider range of tools to achieve their goals. Deep Value enumerates and expands upon the resources and strategies available to value investors today, and describes how the economic climate is allowing value investing to re-emerge. Topics include: Target identification, and determining the most advantageous ends Strategies and tactics of effective activism Unseating management and fomenting change Eyeing conditions for the next M&A boom Activist hedge funds have been quiet since the early 2000s, but economic conditions, shareholder sentiment, and available opportunities are creating a fertile environment for another golden age of activism. Deep Value: Why Activist Investors and Other Contrarians Battle for Control of Losing Corporations provides the in-depth information investors need to get up to speed before getting left behind.

A strategy to profit when markets are range bound—which is half of the time One of the most significant challenges facing today ' s active investor is how to make money during the times when markets are going nowhere. Bookshelves are groaning under the weight of titles written on investment strategy in bull markets, but there is little guidance on how to invest in range bound markets. In this book, author and respected investment portfolio manager Vitaliy Katsenelson makes a convincing case for range-bound market conditions and offers readers a practical strategy for proactive investing that improves profits. This guide provides investors with the know-how to modify the traditional, fundamentally driven strategies that they have become so accustomed to using in bull markets, so that they can work in range bound markets. It offers new approaches to margin of safety and presents terrific insights into buy and sell disciplines, international investing, "Quality, Valuation, and Growth" framework, and much more. Vitaliy Katsenelson, CFA (Denver, CO) has been involved with the investment industry since 1994. He is a portfolio manager with Investment Management Associates where he co-manages institutional and personal assets utilizing fundamental analysis. Katsenelson is a member of the CFA Institute, has served on the board of CFA Society of Colorado, and is also on the board of Retirement Investment Institute. Vitaliy is an adjunct faculty member at the University of Colorado at Denver - Graduate School of Business. He is also a regular contributor to the Financial Times, The Motley Fool, and Minskyville.com.
