I'm creating this Google Earth map as a volunteer for a new museum project underway in Vanuatu. We can't afford to get people to do this for us so I offer to help in any way I can. So if you can think of any scripts or programs that I can modify or adapt, I'd be most grateful if you would pass them on.

Create regions for 3D models - Google Earth Community

Google Earth is a very popular geolocation software that can be used as an aerial camera, helping you explore the world from your computer or mobile device.Google Earth is powered by satellites that capture images of earth and then make them available via the application. The collection of images allow users to view different parts of the world in real-time.

Synthetic Worlds, Virtual Worlds, and Alternate Realities are all terms used to describe the phenomenon of computer-based, simulated environments in which users inhabit and interact via avatars. The best-known commercial applications are in the form of electronic gaming, and particularly in massively-multiplayer online role-playing games like World of Warcraft or Second Life. Less known, but possibly more important, is the rapid adoption of platforms in education and business, where Serious Games are being used for training purposes, and even Second Life is being used in many situations that formerly required travel. The editors of this book captures the state of research in the field intended to reflect the rapidly growing yet relatively young market in education and business. The general focus is set on the scientific community but integrates the practical applications for businesses, with papers on information systems, business models, and economics. In six parts, international authors - all experts in their field - discuss the current state-of-the-art of virtual worlds/alternate realities and how the field will develop over the next years. Chapters discuss the influences and impacts in and around virtual worlds. Part four is about education, with a focus on learning environments and experiences, pedagogical models, and the effects on the different roles in the educational sector. The book looks at business models and how companies can participate in virtual worlds while receiving a return on investment, and includes cases and scenarios of integration, from design, implementation to application.

"Johnson and Petrie have produced an admirable book. Anyone who wants to make sense of Tarkovsky's films-a very difficult task in any case-must read it." -The Russian Review "This book is a model of contextual and textual analysis.... the Tarkovsky myth is stripped of many of its shibboleths and the thematic structure and coherence of his work is revealed in a fresh and stimulating manner." -Europe-Asia Studies "[This book,] with its wealth of new research and critical insight, has set the standard and should certainly inspire other writers to keep on trying to collectively explore the possible meanings of Tarkovsky's film world." -Canadian Journal of Film Studies "For Tarkovsky lovers as well as haters, this is an essential book. It might make even the haters reconsider." -Cineaste This definitive study, set in the context of Russian cultural history, throws new light on one of the greatest-and most misunderstood-filmmakers of the past three decades. The text is enhanced by more than 60 frame enlargements from the films.

Examines artistic interpretations of Tolkien's fantasy world, including movie stills, theatrical performances, games, and comic books, and features the lost art of Mary Fairburn, whose paintings were favored by Tolkien himself.

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)
