Summer reading loss accounts for roughly 80 percent of the rich/poor reading achievement gap. Yet far too little attention is given to this pressing problem. This timely volume now offers not only a comprehensive review of what is known about summer reading loss but also provides reliable interventions and guidance. Written by acknowledged experts and researchers on reading, remedial reading, and special education, this collection describes multiple models of innovative summer reading and book distribution initiatives as well as research-based guidelines for planning a successful summer reading program, including tips on book selection, distribution methods, and direction for crucial follow-up. Most important, the authors clearly show how schools and communities can see greater academic gains for students from low-income families using the methods described in this book than they can from much more costly interventions.

Make every student fluent in the language of learning. The Common Core and ELD standards provide pathways to academic success through academic language. Using an integrated Curricular Framework, districts, schools and professional learning communities can: Design and implement thematic units for learning Draw from content and language standards to set targets for all students Examine standards-centered materials for academic language Collaborate in planning instruction and assessment within and across lessons Consider linguistic and cultural resources of the students Create differentiated content and language objectives Delve deeply into instructional strategies involving academic language Reflect on teaching and learning

"This book focuses on how elementary teachers might plan for and incorporate digitally-supported disciplinary literacy into English Language Arts, Mathematics, Science, and Social Studies to reach all learners. To do so, the authors present the six-phase Planning Elementary Digitally-Supported Literacy (PEDDL) Framework, along with four core practices useful for considering elementary disciplinary literacy. After grounding disciplinary literacy in elementary grades, how it might support all learners, and the rationale for its inclusion in K-5 instruction, core practices are presented, along with a rationale behind those practices. Then, the authors provide an in-depth overview of the PEDDL Framework with examples and research-based underpinnings of each phase. Finally, a paired chapter approach then guides readers through each of the four core disciplines to first overview practices particular to each discipline that are appropriate for elementary grades and then provide detailed lesson planning approaches using the PEDDL Framework for each. Supplementary lesson plan examples are also offered in this book for extended consideration of digitally-supported disciplinary literacy across K-5"--

Centering on the theme of university-based teacher education at a time of system change and its connections with broader global political issues, this book investigates the changing nature of initial teacher education (ITE) as it amalgamated into universities in the New Zealand context. The New Zealand government, like many across the world is seeking improvement

in education system performance, with a particular interest in meeting the needs of those traditionally disadvantaged through education. As a result, over the last 20 years, most ITE has been relocated into universities and teacher qualifications have changed. Not immune to international discourses about the criticality of the teacher workforce to system performance, Aotearoa New Zealand provides a bounded yet connected case of ITE development and reform. The authors draw from a study of teacher education practice in Aotearoa New Zealand and also look at recent research carried out in other jurisdictions to consider how ITE and the academic category of teacher educator is constructed, maintained and practiced within the institution of the university. They highlight the promise of university-based ITE provision, noting areas for development and provide an opportunity to better understand how student teachers within ITE respond to and engage with teacher educators' work in the service of their own learning.
