This popular book examines the growing diversity in schools in a constructive, empowering manner. The authors identify various forms of cultural diversity and suggest ways that teachers can build inclusive classroom environments. Each of the 7 topical chapters deals with a different form of diversity in school: a) racial/ethnic, b) religious, c) ability, d) socioeconomic class, e) linguistic, f) gender diversity, and g) activities. Ways for enabling students to discard existing stereotypes and actively question and reject attitudes and actions not congruent with a pluralistic society are suggested.

Saxon Math is easy to plan and rewarding to teach. The focus on providing teachers with strategies for developing an understanding of HOW and WHY math works builds a solid foundation for higher-level mathematics. - Publisher.

How big is a crocodile? What about a tiger, or the world ’ s largest spider? Can you imagine a tongue that is two feet long or an eye that ’ s bigger than your head? Sometimes facts and figures don ’ t tell the whole story. Sometimes you need to see things for yourself—at their actual size.

Animals move! Follow them as they swing, dance, float, leap, and slide from page to page. Move! is a playful introduction to motion in the animal kingdom that invites young readers to guess some of the unusual ways that animals get around. Includes a lenticular treatment on the cover to create the illusion of movement!

Wings carry tiny insects, fluttering butterflies, and backyard birds, and they even once propelled some dinosaurs up and through the skies. Find out how, when, and why birds and beasts have taken to the air, and discover how wings work in this informative and brilliantly illustrated book about flight.

Inquiry-based life science curriculum for the middle school grades featuring a textbook/workbook that students can write in. May be used as part of a sequence with the Interactive science: physical science and Interactive science: Earth science titles by the same authors.

Collection of articles examining some of the latest work in the understanding of physics.

Illustrations and simple text describe how the males of different species help take care of their young.

Red, blue, yellow, green, orange, purple, pink—animals can be startlingly colorful. Why are they found in so many shades, tints, and hues? From the scarlet ibis to the blue-tongued skink, award-winning author/illustrator Steve Jenkins depicts a whole world of colorful animals in his signature style. Living Color explores a range of animals from old favorites like the pink flamingo to rare and fascinating creatures such as the long-wattled umbrella bird and the ringed caecilian. How do the brilliant feathers, scales, shells, and skin of these animals help them survive? Find out in this strikingly beautiful book how animals use color to warn predators, signal friends, attract a mate, or hide from their enemies.

There are millions of different kinds of plants and animals living on the earth. Many millions more lived here in the past. Where did they all come from? Why have some become extinct and others lived on? In this remarkable book for children, Steve Jenkins explores the fascinating history of life on earth and the awe-inspiring story of evolution, Charles Darwin ’ s great contribution to modern science.
