A comprehensive and thoroughly up-to-date presentation of mainstream social psychology written for undergraduate students in Australia and New Zealand. It covers classic

and contemporary
theories and
research from an
historical
perspective
which reflects
the unfolding of
scientific
inquiry.

The reasons why
people do not
always act in
accord with

their attitudes
has been the
focus of much
social

psychological
research, as
have the factors
that account for
why people
change their
attitudes and
are persuaded by
such influences
as the media.

There is strong

support for the

view that attitude

behavior

consistency and

persuasion

cannot be well

understood

without

reference to the

wider social

context in which

we live.

Although

attitudes are
held by
individuals,

they are social
products to the
extent that they
are influenced
by social norms
and the

expectations of
others. This
book brings
together an
