There ' s no time like the present to create a website that ranks at the top of search engines and drives traffic to your site with these tips, tricks, and secrets.

Every small business or organisation needs a website, whether it is a simple online portfolio or a complex online shop. Expert web design teacher Alannah Moore makes this subject accessible for everyone, even those with no technical or design experience. Avoiding technical language, Alannah provides a summary of the web platforms available, covering, among others, WordPress, Squarespace, Weebly and Shopify. From these the reader can choose the right platform for them, and very quickly get up and running. Drawing on her vast experience of what a novice website builder really needs to know, Alannah covers all the topics they will come across in their online experience: how to choose a good domain name; what content you need for your site; how to work with images and even create your own logo. The reader will also learn how to integrate social media and a blog, so they are set up and in control of their virtual presence from every aspect. This is the perfect book for anyone who doesn't want to pay for an expensive web designer. In Alannah's safe and capable hands, they will find the process of building their site easy and enjoyable, and they'll soon have a successful online presence.

The New Guide For Getting Rankings And Hordes Of High-Quality Traffic With SEO! If you want to get the maximum amount of profit from a website, then you need to get as much traffic as you can. If you want to get the maximum amount of traffic to your website, then you need to get to the top of Google. And if you want to get to the top of Google, then you need SEO or ' Search Engine Optimization ' . Search Engine Optimization is the process of optimizing a website so that Google will be more likely to index it and ensure that it ranks highly for the most relevant key words and phrases.

For example, if you have a website the sells hats, then you might try to get it to rank for the phrase ‘ buy hats online ’ . To do this, you would go through an optimization process that would involve both ‘ on site ’ and ‘ off site ’ strategies. With any luck, you would eventually be able to get your website to the top of the SERP for that term (‘ Search Engine Results Page ’) and thereby attract a huge amount of traffic. More importantly, that traffic would not just be from random visitors but would rather be from specific people who are looking for hats. Better yet, those people will be looking for hats at the very point that they came to your website (why else would they search for hats?) which thereby means that they ’ re ready to buy and it should only take a small push to get them to make that decision. SEO can be a slow going process but it is still possible to very reliably climb the ranks and to get your website to a point where it will start getting more and more organic traffic from searches.

Having a website built can be a complicated and expensive undertaking. For large businesses this is a necessary expense, but for the ever-increasing number of independents and small businesses, this can easily be handled by the intrepid amateur. In *Create Your Own Website Using WordPress in a Weekend*, author Alannah Moore draws on her extensive experience to show how, in just a weekend, almost anyone can create a website in WordPress that looks professional and is entirely tailored to their needs and preferences. Through carefully structured step-by-step tutorials, the book takes the reader through every stage of the web design process. It is illustrated with fabulous examples, and features checklists and tips throughout, covering domain registration, planning, plugins, and choosing the right theme. This will cover the upcoming WP 2012 version.
