Drawing on his classroom experience and the most persuasive research in contemporary composition studies, he devised an innovative new framework: a step-by-step method that moves the student through a series of writing problems, an organic, bottom-up writing process that exposes and acculturates them to the ways writers work in the world. Combining current knowledge of what works in teaching and learning with the most enduring philosophies of classical education, this book challenges readers to develop the skills, attitudes, knowledge, and habits of mind of strong writers.
