Immediate Life Support, 4th June 2020 Caroline was a brilliant teacher and made the session feel very safe at this difficult time. Hand hygiene, cleaning of equipment, social distancing and wearing of PPE helped me feel comfortable participating in my first face to face training for sometime.

This new edition of the bestselling Pocket Guide to Teaching for Medical Instructors by the Advanced Life Support Group and Resuscitation Council (UK) provides an updated guide for instructors teaching on life support courses. Compiled by authors experienced in designing highly respected and successful courses, this guide gives sound, clear advice on the most effective methods of teaching. Content covers an introduction to the basic principles of teaching and deals in detail with a number of modes of teaching on courses. Lectures, skill stations, role play, workshops, discussions and e-learning are all explored and in each case practical guidance is given to help the reader to become a more effective teacher. Though designed for trainees on life support instructor courses, Pocket Guide to Teaching for Medical Instructors contains practical guidance applicable to any health professional interested in becoming a more effective teacher.

This title is directed primarily towards health care professionals outside of the United States. It is a well-known text that provides guidelines for over 40 common nursing procedures carried out by carers in a variety of settings. The development of competence in these practices is one of the most important aspects of pre-registration programmes, and this is one of the few UK-based texts that takes an educational approach to these practices as opposed to a purely procedure-driven approach. As in previous editions, the emphasis is on a holistic approach with the recognition that each patient is a unique individual. Each procedure contains rationale and information for patient education in addition to step by step guidance. Skills explained step by step to facilitate learning The comprehensive range of procedures including advanced practices will give readers confidence when they begin clinical work Relevance to hospital and community settings makes it applicable to a wide audience The rationale sections link to the evidence-base thereby ensuring best practice

In the event of a paediatric cardiac arrest, it is essential to be able to respond rapidly, providing safe and effective care. The second edition of this successful text provides nurses with a practical and systematic guide to the rapid assessment and delivery of appropriate resuscitation to infants and children. Conforms to current European Resuscitation Council Guidelines Based on up-to-date research and evidence-based practice protocols Synoptic approach enables rapid delivery of effective treatment Written by experts in the field of both resuscitation and paediatrics Paediatric Advanced Life Support is a succinct yet comprehensive guide and is an essential purchase for any health professional likely to encounter an emergency situation.

In the event of an adult cardiac arrest, it is essential to be able to respond rapidly, providing safe and effective care. This new and updated edition of Advanced Cardiac Life Support provides the theoretical background to resuscitation as well as explaining the essential resuscitation skills required to manage an adult cardiac arrest- from the time it occurs until subsequent transfer to the ICU. The emphasis is on the prevention of cardiac arrest with detailed information on the management of peri-arrest arrhythmias and acute coronary syndromes. Advanced Cardiac Life Support also discusses ethical and legal issues, record keeping, dealing with bereavement, audit, equipment and training- providing an essential quick reference tool for nurses and health care professionals. An evidence-based approach to emergency care based on the latest Resuscitation guidelines A succinct yet comprehensive guide to the management of cardiac arrest Written by an experienced resuscitation training officer who is also a qualified nurse and former CCU Charge Nurse

This manual is aimed at all healthcare practitioners, from novice to expert, who care for the critically ill patient, recognising that different disciplines contribute to the provision of effective care and that essential knowledge and skills are shared by all practitioners. It provides evidence-based guidelines on core critical care procedures and includes a comprehensive competency framework and specific competencies to enable practitioners to assess their abilities and expertise. Each chapter provides a comprehensive overview, beginning with basic principles and progressing to more complex ideas, to support practitioners to develop their knowledge, skills and competencies in critical care.

Manual of Perioperative Care is a comprehensive manual of principles of care designed to support the clinical practice of perioperative practitioners, whether they are nurses or operating department practitioners. This book meets the needs of those studying perioperative practice as well as those who would like an up-to-date comprehensive reference on their bookshelf. It covers the fundamentals of perioperative practice, placing them within the wider context of modern surgical care. With a practical, accessible focus, aided by full colour illustrations, this book follows the journey that the patient make through their surgical care, with sections on: The foundation for safe and effective perioperative care Infection prevention and control Patient safety and managing risks Different patient care groups Approaches to surgery This book is essential reading for all students on perioperative courses, as well as newly qualified perioperative nurses and operating department practitioners.

This book was the first of its kind to focus on providing mental health nurses with the core knowledge they need.

Advanced Paediatric Life Support is the internationally renowned manual on emergency paediatric care, written to support the course run by the Advanced Life Support Group. Using their structured approach, a tried and tested practical method of treating children during the crucial first few hours of a life threatening illness or injury, Advanced Paediatric Life Support is used by doctors, nurses and allied health professionals dealing with emergencies in children. Its clear layout and straightforward style make it a highly practical tool both for training and in the event of an emergency. The sixth edition includes major new features bringing it right up to date, including: The latest International Liaison Committee on Resuscitation (ILCOR) 2015 Guidelines The latest consensus guidelines on paediatric trauma Enhanced discussions on the importance of human factors A new and improved design including full colour photographs and diagrams Free access to the Wiley E-Text With this book at hand, all those providing care during paediatric emergencies can be confident in having comprehensive and authoritative guidance on the recognition and management of life threatening conditions necessary to save a child's life. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from iTunes, Google Play or the MedHand Store.
