1998 Land Rover Defender: In

1998, the Land Rover Defender

got a new engine, which was

dubbed the Td5. The Td5 was a

2.5-litre, five-cylinder inline turbo-

diesel engine. Unlike the Td1,

which it replaced, the Td5 met

new Euro III emissions standards.

2007 Land Rover Defender: The

Td5 was the last Defender engine

to be built in-house.

The Land Rover 300Tdi engine
was an evolution upon the earlier
200Tdi with many improvements
and refinements for better on road
performance. However, it has the
same capacity and power as its
predecessor and slightly worse
fuel consumption, which has lead
some people to downgrade to the
200Tdi given the option.

This is the official factory parts
catalog and covers all Land Rover
Defender vehicles from model year
