The present book takes a practical, skill-building approach to studying or teaching leadership. The text balances theory with real-world applications. DuBrin, a highly respected author and consultant, incorporates current research on leadership and real-world business events. Leadership profiles focus on successful men and women to whom students can easily relate, such as lower-level, small business, and not-for-profit leaders. This world-class text on leadership is ideal for instructors as well as students to focus on the quality of leadership as needed to be inculcated.

In keeping with the text's increased emphasis on interpersonal skills, the coring and interpretation section of each leadership self assessment has been expanded to help students better understand and apply their results. The chapter on leadership and ethics, focus on moral ethical leadership in relation to standard business practices. In particular, the chapter highlights ethical decision-making and the

importance of social responsibility with reference to Enron and WorldCom.

The past half-century has witnessed a dramatic increase in the scale and complexity of scientific research. The growing scale of science has been accompanied by a shift toward collaborative research, referred to as "team science." Scientific research is increasingly conducted by small teams and larger groups rather than individual investigators, but the challenges of collaboration can slow these teams' progress in achieving their scientific goals. How does a team-based approach work, and how can universities and research institutions support teams? Enhancing the Effectiveness of Team Science synthesizes and integrates the available research to provide guidance on assembling the science team; leadership, education and professional development for science teams and groups. It also examines institutional and organizational structures and policies to support science teams and identifies areas where further research is needed to help science teams and groups achieve their scientific and translational goals. This report offers major public policy recommendations for science research agencies and policymakers, as well as recommendations for individual scientists, disciplinary associations, and research universities. Enhancing the Effectiveness of Team Science will be of interest to university research administrators, team science leaders, science faculty, and graduate and postdoctoral students.
