Being healthy is much more than being physically fit and free from disease. Health is the state of well-being in which all of the components of health -- physical, emotional, social, mental, spiritual, and environmental -- are in balance. To be truly healthy, you must take care of all six components. - p. 11.

Commit to a healthy lifestyle with the newest edition of AN INVITATION TO HEALTH from renowned author Dianne Hales. Packed with discussions on personal health—from physical and mental health to social and sexual issues—this market-leading book candidly explores the mind, body, and spirit, and compels you to start making improvements today. Readings include a new chapter on consumer health, with “Consumer Alert” features to critically evaluate your health care options, along with no-cost and low-cost ways to make changes that yield big benefits. More than a superficial self-help approach, AN INVITATION TO HEALTH: The Power of Now! presents hard data, such as ACHA’s 2013 National College Health Assessment, new DSM-5 criteria, and federal reports on the health of our nation and the international community. Practical exercises and features also help you begin positive change today by evaluating your diet, exercise habits, relationships, social media presence, and much more. In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice: community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

This convenient Portable Version of Edwards/Wattenberg/Lineberry, Government in America: People, Politics, and Policy features all the content of the original comprehensive text split into four lightweight, paperbacks—accompanied by new practice tests at the back of each volume. Framing its content within a resonant “politics matters” theme and emphasizing public policy throughout, Government in America illustrates the impact that government has on the daily lives of each and every American, motivating students to become active participants in all aspects of our political system, and helping overcome the biggest challenge instructors face in this course -- student apathy toward government.

In her own singularly beautiful style, Newbery Medal winner Sharon Creech intricately weaves together two tales, one funny, one bittersweet, to create a heartwarming, compelling, and utterly moving story of love, loss, and the complexity of human emotion. Thirteen-year-old Salamanca Tree Hiddle, proud of her country roots and the “Indian-ness in her blood,” travels from Ohio to Idaho with her eccentric grandparents. Along the way, she tells them of the story of Phoebe Winterbottom, who received mysterious messages, who met a “potential lunatic,” and whose mother disappeared. As Sal entertains her grandparents with Phoebe’s outrageous story, her own story begins to unfold—the story of a thirteen-year-old girl whose only wish is to be reunited with her missing mother.

“Inclusive Physical Activity” is a text and reference for exercise and physical activity practitioners committed to offering optimal physical activity programming to people of differing abilities in school, recreation, sports, and community fitness settings. The updated second edition offers strategies for physical activity programming across the life span, from infancy to adulthood.

This report is part of WHO’s response to the 49th World Health Assembly held in 1996 which adopted a resolution declaring violence a major and growing public health problem across the world. It is aimed largely at researchers and practitioners including health care workers, social workers, educators and law enforcement officials.
