or media products in a digital landscape dominated by intimate, though quite public, modes of self-disclosure and pervaded by broader practices of self-branding. In thinking about how girlhood as a potentially vulnerable subject position circulates as a commodity, *Girls, Autobiography, Media* argues that by using digital technologies to write themselves into culture, girls and young women are staking a claim on public space and asserting the right to create and distribute their own representations of girlhood. Their texts—in the form of blogs, vlogs, photo-sharing platforms, online diaries and fangirl identities—show how they navigate the sometimes hostile conditions of online spaces in order to become narrators of their own lives and stories. By examining case studies across different digital forms of self-presentation by girls and young women, this book considers how mediation and autobiographical practices are deeply interlinked, and it highlights the significant contribution girls and young women have made to contemporary digital forms of life narrative.

This provocative look at the connections—and conflicts—between Latinos and African Americans in the United States assesses the challenges facing both groups as they strive to achieve the American dream. • Reviews music forms (such as jazz, salsa, disco, and hip-hop), political connections, and intermarriages between Latinos and African Americans • Examines controversial issues such as the Trayvon Martin case, members of the Mexican Mafia, and gang violence • Provides points of unity between Latinos and African Americans • Sheds light on the common perspectives and backgrounds of the two ethnic groups as well as their cultural differences

Centers of the Cancer Universe: A Half-Century of Progress Against Cancer reviews 50-years of progress in cancer research and treatment since the signing of the 1971 National Cancer Act, and the role played by the NCI-designated cancer centers created by the Act.

Many people dream of escaping modern life, but most will never act on it. This is the remarkable true story of a man who lived alone in the woods of Maine for 27 years, making this dream a reality—not out of anger at the world, but simply because he preferred to live on his own. A New York Times bestseller In 1986, a shy and intelligent twenty-year-old named Christopher Knight left his home in Massachusetts, drove to Maine, and disappeared into the forest. He would not have a conversation with another human being until nearly three decades later, when he was arrested for stealing food. Living in a tent even through brutal winters, he had survived by his wits and courage, developing ingenious ways to store edibles and water, and to avoid freezing to death. He broke into nearby cottages for food, clothing, reading material, and other provisions, taking only what he needed but terrifying a community never able to solve the mysterious burglaries. Based on extensive interviews with Knight himself, this is a vividly detailed account of his secluded life—why did he leave? what did he learn?—as well as the challenges he has faced since returning to the world. It is a gripping story of survival that asks fundamental questions about solitude, community, and what makes a good life, and a deeply moving portrait of a man who was determined to live his own way, and succeeded.

John Kuykendall is a young Deputy Sheriff in rural Ohio. One night he is sent to a remote residence down a one lane stone Road at the edge of a state forest. When he arrives he finds a terrified family and has an encounter in the Woods with an unknown creature that will change his life. Forever. Shaken to the core, he asks questions for which there seem no answers or at least no one is willing to give answers. Twenty years and three books later, John is at a monster conference sitting at a table. While selling books and signing autographs, he is approached by a beautiful younger woman. Her name is Christina Crawford. She invites him to meet her after the conference deep inside Pleasant Hill Penitentiary. John agrees and sneaks back inside and finds Christina in an abandoned cell block. She leads him to a metal door. Squatch Files Begins. The Story Continues.

The definitive reference for all Wes Anderson fans. Loaded with rich imagery and detailed analysis of his incredible films – including the classics *The Grand Budapest Hotel*, *Rushmore*, *The Royal Tenenbaums* and *Moonrise Kingdom* as well as Anderson's highly anticipated new release *The French Dispatch* – this is the first book to feature all of Wes Anderson's movies in a single volume. Acclaimed film journalist Ian Nathan provides an intelligent and thoughtful examination of the work of one of contemporary film's greatest visionaries, charting the themes, visuals, and narratives that have come to define Anderson's work and contributed to his films an idiosyncratic character that's adored by his loyal fans. From Anderson's regular cast members – including Bill Murray and Owen Wilson – to his instantly recognisable aesthetic, recurring motifs and his scriptwriting processes, this in-depth collection will reveal how Wes Anderson became one of modern cinema's most esteemed and influential directors. Presented in a slipcase with 8-page gatefold section, this stunning package will delight all Wes Anderson devotees and movie lovers in general.

with the smart monitoring and controlling of stand-alone and grid-connected solar photovoltaic (PV) systems for increased efficiency. Growth in the area of artificial intelligence with embedded system applications has led to a new era in computing, impacting almost all fields of science and engineering. Soft computing methods implemented to energy-related problems regularly face data-driven issues such as problems of optimization, classification, clustering, or prediction. The authors offer real-time implementation of soft computing and embedded system in the area of solar energy to address the issues with microgrid and smart grid projects (both renewable and non-renewable generations), energy management, and power regulation. They also discuss and examine alternative solutions for energy capacity assessment, energy efficiency systems design, as well as other specific smart grid energy system applications. The book is intended for students, professionals, and researchers in electrical and computer engineering fields, working on renewable energy resources, microgrids, and smart grid projects. Examines the integration of hardware with stand-alone PV panels and real-time monitoring of factors affecting the efficiency of the PV panels Offers real-time implementation of soft computing and embedded system in the area of solar energy Discusses how soft computing plays a huge role in the prediction of efficiency of stand-alone and grid-connected solar PV systems Discusses how embedded system applications with smart monitoring can control and enhance the efficiency of stand-alone and grid-connected solar PV systems Explores swarm intelligence techniques for solar PV parameter estimation
