Helen and Scott Nearing, authors of Living the Good Life and many other bestselling books, lived together for 53 years until Scott's death at age 100. Loving and Leaving the Good Life is Helen's testimonial to their life together and to what they stood for: self-sufficiency, generosity, social justice, and peace. In 1932, after deciding it would be better to be poor in the country than in the city, Helen and Scott moved from New York Ciy to Vermont. Here they created their legendary homestead which they described in Living the Good Life: How to Live Simply and Sanely in a Troubled World, a book that has sold 250,000 copies and inspired thousands of young people to move back to the land. The Nearings moved to Maine in 1953, where they continued their hard physical work as homesteaders and their intense intellectual work promoting social justice. Thirty years later, as Scott approached his 100th birthday, he decided it was time to prepare for his death. He stopped eating, and six weeks later Helen held him and said goodbye. Loving and Leaving the Good Life is a vivid self-portrait of an independent, committed and gifted woman. It is also an eloquent statement of what it means to grow old and to face death quietly, peacefully, and in control. At 88, Helen seems content to be nearing the end of her good life. As she puts it, "To have partaken of and to have given love is the greatest of life's rewards. There seems never an end to the loving that goes on forever and ever. Loving and leaving are part of living." Helen's death in 1995 at the age of 92 marks the end of an era. Yet as Helen writes in her remarkable memoir, "When one door closes, another opens." As we search for a new understanding of the relationships between death and life, this book provides profound insights into the question of how we age and die.

'It is no longer possible to practice, teach, or study purely domestic intellectual property law within Europe. European intellectual property norms now structure protection throughout the continent (and even beyond). Paradoxically, what might seem as a simplification of legal rules has created a maze of new complexities substantive, institutional and methodological. This collection by some of the leading scholars in European IP manages to capture that complexity without sacrificing clarity. Canvassing the entire field with a rich array of contributions, the book both highlights the roots of European IP law and asks important fundamental questions about where it is going. One can only hope that it is read by anyone with a hand in the future development of European IP law.' Graeme B. Dinwoodie, University of Oxford, UK 'Christophe Geiger has put together a very fine collection of essays by many of the very best scholars in European intellectual property law. The essays explore the basis, extent, as well as the successes and failings of regional harmonization of trade marks, geographical indications, copyright, designs, patents and remedies. The celebrated cast of authors naturally discuss, in addition to the various directives and regulations on each topic, the Treaty provisions on exhaustion of rights and competition (and their interpretation), relevant provisions on legislative competence, Article 17(2) of the Charter, other fundamental rights, and the growing case law of the Court of Justice. There is essential material here for anyone interested in European intellectual property law, as well as ideas for the improvement and further development of European IP law.' Lionel Bently, University of Cambridge, UK Constructing European Intellectual Property offers a comprehensive assessment of the current state of intellectual property legislation in Europe and gives direction on how an improved system might be achieved. This detailed study presents various perspectives on what further actions are necessary to provide the circumstances and tools for the construction of a truly balanced European intellectual property system. The book takes as its starting point that the ultimate aim of such a system should be to ensure sustainable and innovation-based economic growth while enhancing free circulation of ideas and cultural expressions. Being the first in the European Intellectual Property Institutes Network (EIPIN) series, this book lays down some concrete foundations for a deeper understanding of European intellectual property law and its complex interplay with other fields of jurisprudence as well as its impact on a broad array of spheres of social interaction. In so doing, it provides a well needed platform for further research. Academics, policymakers, lawyers and many others concerned with establishment of a regulatory framework for intangibles in the EU will benefit from the extensive and thoughtful discussion presented in this work.

A short history of nearly everything classical. The foundations of the modern world were laid in Alexandria of Egypt at the turn of the first millennium. In this compulsively readable narrative, Justin Pollard and Howard Reid bring one of history's most fascinating and prolific cities to life, creating a treasure trove of our intellectual and cultural origins. Famous for its lighthouse, its library-the greatest in antiquity-and its fertile intellectual and spiritual life--it was here that Christianity and Islam came to prominence as world religions--Alexandria now takes its rightful place alongside Greece and Rome as a titan of the ancient world. Sparkling with fresh insights on science, philosophy, culture, and invention, this is an irresistible, eye- opening delight.

In the tradition of the bestselling Intellectual Capital, internationally recognized management and quality expert Rafael Aguayo shows how integrated mastery of many areas of knowledge -- MetaKnowledge -- can give corporate managers an edge, no matter what the future has in store. In today's world, the basis of economic power and wealth is rapidly shifting from physical resources to intellectual resources. Former powerhouses like U.S. Steel are now minor players, while modern giants such as Microsoft dominate industries that didn't even exist twenty-five years ago. The economy undergoes wild fluctuations. The Internet boom has come and gone. Through globalization, international boundaries are becoming less important every day. In such a dramatically changing environment, the management philosophy that endures must be based on principles that transcend daily occurrences and swings in the market. That's where MetaKnowledge comes in. Rafael Aguayo brings years of firsthand consulting experience to this book and galvanizes it with an impressive yet accessible body of academic study. A disciple of W. Edwards Deming, Aguayo studied with the man who brought quality to the Japanese. He has since expanded his field of expertise to encompass many subjects that contribute to successful business strategies, no matter what the industry. In The MetaKnowledge Advantage, Aguayo gives American managers an advantage by helping them break out of their narrow fields of expertise, synthesizing areas of knowledge as diverse as ecology, psychology, statistics, chaos theory, self-actualization, and the theory of multiple intelligences. Drawing on the work of Walter Shewhart (the father of Statistical Quality Control), W. Edwards Deming, Carl Jung, James Lovelock, Bertrand Russell, and many other luminaries, The MetaKnowledge Advantage offers a comprehensive -- and extremely flexible -- strategy for good management and ethical behavior in any industry.
