This high-impact book has been written by an experienced industry professional with a corporate perspective. The author is a Master Trainer who approaches the soft skills training from the point of view of a corporate soft skills training. Written in a business storytelling format, the training in the book is imparted by a skillful industry leader. This has not been written as the theoretical exercise. No boring theory, no wasted time! Rather, each chapter has been approached as a working session: Imparting soft skills by solving real problems and discussing workable solutions which the reader can apply immediately and keep for life. The structure of the book is in the form of a Personal Development Compass developed by the author. Just as a compass guides travelers through their journey and helps them to reach their destination, in the same way, the Personal Development Compass too guides the reader to navigate their way through the maze of the different soft skills and help them to polish their personalities. The methodology applied is 'Learning-By Doing': This approach can be summed up as follows: 'Educate Briefly-Then Train at Length'- On other words, less focus on theory, more real-world action, and solutions. The training imparted in the book starts with the Personality Development objective in mind and then facilitates and demonstrates methods to achieve those objectives.VERTICAL 1: Theme: CONFIDENCEHeadings: RELATIONSHIPS & WELL-BEINGThis vertical helps the reader in gaining the mental strength, motivation & confidence to approach their lives with a Positive Mental Attitude. Development is sometimes defined as the process of expansion of human capabilities rather than materialistic acquisition and possession. The significance of personality development transcends beyond the individual domain and is now recognized as a critical component of corporate success. This is one of the reasons why the modern corporate sector is now engaged in soft skill development to make the hard skill endowment of its professionals more complete, effective and successful. In the labour-surplus economy of India, it is interesting to observe that while the demand for labour is growing rapidly, most of the unemployed labour cannot effectively be absorbed in productive occupations. Many of the unemployed labourers seeking opening in the labour market possess the necessary hard skill but are deficient in soft skill and the desirable personality pattern. As a matter of fact, soft skills and desirable personality traits have many things in common and they are complementary in nature, in spite of some minor nuances. The title of the book reflects an interlocking relationship between what seems to be the two apparently different domains.

Corporations have long passed the buck of training people in employability, soft skills and personality development to the educational institutions. Textbooks must support and supplement the efforts of teachers and the students. Texts must find new ways of projecting the subject reflecting inter-dependent nature of personality development, career planning, soft skills, employability, and English language skills, the lingua franca of international community and link Indian language.

Personality development is an indispensable tool that helps an individual to flourish personal and professional skills. An extraordinary personality is sophisticated, well dressed and groomed, exuding confidence in speech and interpersonal skills. The factors such as biological characteristics, family and social groups, cultural and social factors contribute towards formation of an individual personality. Good communication is vital to any institution's successful operation and equally imperative for personality development. The book 'Communication Skills and Personality Development' is a thorough attempt to present the aforesaid concepts in a simple, understandable, and student-friendly language to gaze the difficult situations and handle them appropriately. The course on Communication Skills and Personality Development has been recommended by V Deans Committee for B.Sc. (Agri.), B.Sc. (Horti.) and B.Tech. faculties throughout the agricultural universities in India; this book has been administered to cover the entire syllabus of this course. The book is highly recommended as a text book for the under graduate agricultural students.
