It is well known that the applications of unit operations like heat transfer, evaporation, extraction, mixing, filtration and a host of others are quite common in the pharmaceutical industry, be it in the production of synthetic drugs, biological and microbiological products or in the manufacture of pharmaceutical formulations. As such anyone who is to look after these manufacturing operations must be quite knowledgeable with the theoretical and equipment aspects involved in the relevant unit operations. Since a major involvement of the pharmacy graduates lies in the numerous manufacturing operations mentioned above, it is very much necessary that the subject is taught with a pharmacy orientation. There is no book so far which has achieved this. The existing books on unit operations give extensive theory and also
