Scholars have long recognized that Jonathan Edwards loved the Bible, but preoccupation with his roles in Western "public" life and letters has eclipsed the significance of his biblical exegesis. In *Edwards the Exegete*, Douglas A. Sweeney fills this lacuna, exploring Edwards' exegesis and its significance for Christian thought and intellectual history. As Sweeney shows, throughout Edwards' life the lion's share of his time was spent wrestling with the words of holy writ. After reconstructing Edwards' lost exegetical world and describing his place within it, Sweeney summarizes his four main approaches to the Bible—canonical, Christological, redemptive-historical, and pedagogical—and analyzes his work on selected biblical themes that illustrate these four approaches, focusing on material emblematic of Edwards' larger interests as a scholar. Sweeney compares Edwards' work to that of his most frequent interlocutors and places it in the context of the history of exegesis, challenging commonly held notions about the state of Christianity in the age of the Enlightenment. *Edwards the Exegete* offers a novel guide to the theologian's exegetical work, clearing a path that other specialists are sure to follow. Sweeney's significant reassessment of Edwards' place in the Enlightenment makes a major contribution to Edwards studies, eighteenth-century studies, the history of exegesis, the theological interpretation of Scripture, and homiletics.

Identifying the existing challenges and shortfalls of China's current HIV/AIDS programming, this book provides an understanding of the history of HIV/AIDS in China, comparing government responses to global best practice in prevention and treatment. Considering three key populations in China, namely, female sex workers, people who inject drugs and floating migrants, *Living in the Shadows of China's HIV/AIDS Epidemics* highlights the effects of high mobility and marginalisation on the spread of HIV in China. It is argued that these groups often suffer from stigmatisation and a lack of human security, resulting in sub-optimal outcomes for HIV/AIDS intervention and prevention efforts and the reinforcement of high-risk behaviours, further contributing to the transmission of the virus to the general population. In addition to the emerging body of literature, this book further elucidates the myriad of challenges posed by HIV/AIDS epidemics, allowing sustained engagement and a fresh insight into how governments might respond to the needs of individuals living with HIV/AIDS, both in China and globally. Including case studies which give voice to research participants in a rich and engaging way, this book will appeal to students and scholars of Chinese Studies, Asian Studies, International Relations and Political Science, as well as those engaged in epidemiological studies in the Health Sciences.
