This publication has been written to explain the functions that an administrator must understand in order to set up and manage a Primavera P6 EPPM database. This publication may be used to run a training course and includes exercises at the end of each chapter for the students to complete. After the course, students may use this publication as a reference book. The book is aimed at assisting database administrators to understand how to configure and administer a P6 database after the software and databases have been installed. The objectives of this book are to demonstrate: The structure of a P6 database, The P6 tools available to access, set up and administer a P6 Database, The steps that should be considered when implementing a P6 database, The P6 functions that an Administrator must understand in order to successfully administer a P6 EPPM database, How to setup/configure a P6 Database using the Web interface, and How to administer a P6 Database using the Web interface. The book is aimed at: People who wish learn the software but are unable to attend a training course and find the software reference manual hard going. Project management companies who wish to run their own software training courses or provide their employees with an alternative text to the vendor supplied user manual. Training organizations requiring a training manual to run their own training courses. This book is a PMI Approved course and instructors PowerPoint slide shows are available to training organizations. PMI REPs may apply to have this course licensed to them and award 14 PDUs to each attendee. Primavera

Systems Inc. originally asked the author to write this book and this publication is ideal for people who would like to gain an understanding of how the software operates up to an intermediate level. It covers the Primavera Versions 8, 15 and 16 EPPM Web tool and the book is designed to show administrators in any industry how to setup an EPPM database. It explains in plain English and in a logical sequence, the steps required to create and maintain an EPPM database. It tackles some of the more complex aspects of the software that the user manual does not address. The book is intended to be used: As a self-teach book, or A user guide, or A training manual for a two-day training course. This book is written by an experienced scheduler, who has used the software at the sharp end of projects and is not a techo. It draws on the author's practical experience in using the software in a wide variety of industries. About the Author: Paul Harris holds an Honours Degree in Civil Engineering obtained in the UK and is a Certified Cost Engineer through AACEI International, a PRINCE2 Registered Practitioner and a "Managing Successful Programmes" Registered Practitioner. He has worked in the project controls industry for a number of years and has assisted many companies in a range of industries to set up and run project controls systems. His Melbourne, Australia based company, Eastwood Harris Pty Ltd, offers project controls consulting and training services worldwide with a strong focus on Microsoft Project and Primavera software.

This book focuses on planning and scheduling for construction projects and presents field-site-based best practices related to schedule management and Primavera P6, and offers strategies

Online Library Primavera User Guide

that utilise scheduling methodologies and tools. These strategies are based on the theory of schedule management and features of scheduling software packages, which can be applied in every field site no matter what the construction project type is. This book introduces examples and tips, as well as suggestions for developing efficient schedules and management methods that ensure immediate improvement in schedule controlling. This book is designed to be Primavera P6 user-friendly, so readers using P6 can understand P6-based schedule management with ease. This book covers all matters schedulers should know and understand regarding schedule management. It also includes the missing manuals of schedule management textbooks and Primavera P6 manuals.

This book is a user guide and training manual written for Project Management Professionals who wish to learn how to set up a database and plan and control projects using Primavera P6 with or without Resources and Roles. Professional Client and Optional Client Due to the new menus and toolbars release in Version 8. It explains some of the differences from SureTrak, P3, Microsoft Project and Asta Powerproject to assist people converting from other products. The book is designed to teach planners and schedulers in any industry how to setup and use the software in a project environment. It explains in plain English and in a logical sequence, the steps required to create and maintain an unresourced and resourced schedule. It tackles some of the more complex aspects of the software that the user manual does not address. It highlights the sources of information and the methods that should be employed to produce a realistic and useful project schedule. About the Author Paul Harris holds an Honours Degree in Civil Engineering obtained in the UK and is a Certified Cost Engineer through ACEI International, a PRINCE2 Registered Practitioner and a "Managing Successful Programmes" Registered Practitioner. He has worked in the project controls industry for a number of years and has assisted many companies in a range of industries to set up and run project controls systems. His Melbourne, Australia based company, Eastwood Harris Pty Ltd, offers project controls consulting and training services worldwide with a strong focus on Microsoft Project and Primavera software.

All scheduling software is difficult to learn for a number of reasons. None have the optimal settings when installed and Layouts, User Preferences and default options need to be adjusted to obtain the best possible performance. Usually the Help files do not connect the user to real life situations and do not explain the practical use of functions. Furthermore, there are many flicks and switches with obscure names that are difficult to understand or decide what they do or which are important. These issues make learning the software very difficult without a

Online Library Primavera User Guide

comprehensive guide written by an experienced user. Investing in a book written by Paul E Harris will address all these issues and allow you to setup the software properly and understand all the obscure functions letting you become productive more quickly and enhance your career opportunities and salary with a solid understanding of the software. This book is an update of the author's Primavera P6 Version 8 to 19 book and contains a new section on Visualizer. The workshops have been updated so they start in the future. The book has been written so it may be used with any software industry version. The book is packed with screen shots, constructive tips and contains workshops with solutions at the end of each chapter for the reader to practice the skills taught. It has been written so it may be used with either the Professional Project Management Client version or the Enterprise Project Portfolio Management Optional Client. The book is aimed at: 1. People who wish learn the software but are unable to attend a training course and find the software reference manual hard going. 2. Project management companies who wish to run their own software training courses or provide their employees with an alternative text to the vendor supplied user manual. 3.
