PRINCIPLES OF MICROECONOMICS, 4th Edition features a strong revision of content in all 22 chapters while maintaining the clear and accessible writing style that is the hallmark of the highly respected author.

PRINCIPLES OF MICROECONOMICS, Sixth Edition, became a best seller after its introduction and continues to be the most popular and widely used text in the economics classroom. Instructors found it the perfect complement to their teaching. A text by a superb writer and economist that stressed the most important concepts without overwhelming students with an excess of detail was a formula that was quickly imitated, but has yet to be matched. The sixth edition features a strong revision of content in all twenty-two chapters. Dozens of new applications emphasize the real-world relevance of economics for today's students through interesting news articles, realistic case studies, and engaging problems. The premier ancillary package is the most extensive in the industry, using a team of instructors/preparers that have been with the project since the first edition. The text material is again fully integrated into Aplia, the best-selling online homework solution. I have tried to put myself in the position of someone seeing economics for the first time. My goal is to emphasize the material that students should and do find interesting about the study of the economy.-N. Gregory Mankiw. Microeconomic Principles and Problems offers a comprehensive introduction to all major perspectives in modern economics, including mainstream and heterodox approaches. Through providing multiple views of markets and how they work, it will leave readers better able to understand and analyse the complex behaviours of consumers, firms, and government officials, as well as the likely impact of a variety of economic events and policies. Most principles of microeconomics textbooks cover only mainstream economics, ignoring rich heterodox ideas. They also lack material on the great economists, including the important ideas of Adam Smith, Karl Marx, Thorstein Veblen, John Maynard Keynes and Friedrich Hayek. Mainstream books neglect the kind of historical analysis that is crucial to understanding trends that help us predict the future. Moreover, they focus on abstract models more than existing economic realities. This engaging book addresses these inadequacies. Including explicit coverage of the major heterodox schools of thought, it allows the reader to choose which ideas they find most compelling in explaining modern economic realities. Written in an engaging style focused on real world examples, this ground-breaking book brings economics to life. It offers the most contemporary and complete package for any pluralistic microeconomics class.

"yards" through social media ?all without "friending" your students). MindTap Economics Instant Access for Mankiw, PRINCIPLES OF MICROECONOMICS, 7E is well beyond an eBook, a homework solution or digital supplement, a resource center website, a course delivery platform or a Learning Management System. It is the first in a new category--the Personal Learning Experience. The Learning Path begins with New Mankiw Video Roadmaps that feature Greg Mankiw introducing the chapter content within real world context, helping students understand how economics relates to what they experience in their lives and see in the world around them. The MindTap Reader features a variety of media assets specifically designed to address the challenges students and instructors have told us impede learning. ConceptClips address the challenge of understanding economics terminology that students face when first introduced to the subject matter. Graphing at a Glance video tutorials enhance the learning experience by bringing graphs to life, allowing students to see graphs physically move along the axes. Auto-graded homework assignments from Aplia give students hands-on application without adding to the instructor's workload. New Problem Walk-Throughs further explain difficult concepts by walking students through solving problems similar to those in the text, from start to finish.
